REPORT OF THE DEPUTY MINISTER

TO: The Honourable John Yaremko, Q.C.,
Minister of Public Welfare.

I have the honour to submit herewith the Thirty-Fifth Annual Report of the Department of Public Welfare. This covers the fiscal year ending March 31, 1966, a period prior to your appointment to the portfolio of Minister of Public Welfare in November, 1966.

This is the last Report under the title Department of Public Welfare. The Department of Social and Family Services Act 1967 changed the name in keeping with our new and expanded functions, marked by an unprecedented volume of social service legislation implemented in 1967.

This Thirty-Fifth Report looks toward a new stage in the Department's history and it is respectfully submitted.

A handwritten signature in dark ink, reading "James S. Band". The signature is written in a cursive style with a large, stylized initial "J" and "B".

James S. Band, Deputy Minister.

CHILD WELFARE BRANCH

CHILD WELFARE ACT 1965. Although this Act did not come into force until January 1st, 1966 the major concern of The Child Welfare Branch during 1965 was in preparation for the enactment of the new legislation. The new Act incorporating recommendations made by the Minister's Advisory Committee on Child Welfare, contains many radical changes designed to provide better service to children and families in Ontario.

The most significant change, and one that over the years will have far reaching effect, is the change in emphasis from the protection of neglected children to the prevention of conditions requiring the protection of children. To achieve this end it was necessary to change the financial structure of the Children's Aid Societies.

For the first time the money required to strengthen family life through guidance, counselling and other services is provided for by legislation with the province and municipal governments sharing the cost. Residence requirements have been modified and children who are now committed to permanent care become wards of the Crown. Other changes in the Act and the Regulations detailing classification and duties of social workers employed by Children's Aid Societies further support the intent of the Act.

Bill 180 had its third reading in June 1965 to be followed by printed Regulations in November 1965. The most urgent need at this time was to assist Children's Aid Societies in the preparation of their estimated budgets for filing with the Director of Child Welfare and the Council of each Municipality in accordance with the Act and Regulations. In order to facilitate matters, the Local Directors of all the Children's Aid Societies were invited to meet with senior staff of the Department of Public Welfare in Toronto where two full days were spent in discussing pertinent sections of the Act and in clarifying various procedures. Attendance included 100% representation from the Societies.

The first budget presentations, while posing minor problems, were, on the whole, well received. However, the need to establish a financial unit within the Branch to work on a continuing basis with the Societies was recognized.

In order to meet the challenge and additional responsibilities of the new Act, the number of Child Welfare Supervisors employed by the Branch was already being increased.

Experience during 1965 has confirmed the need for improved preventive services to children in their own homes and for more specialized services to meet the needs of the ever increasing number of emotionally disturbed and mentally ill children coming to the attention of Children's Aid Societies.

The trend forecast last year of a continuing increase in the number of children in the care of the Societies has been sustained in 1965 with a 6% increase during the year.

In 1965-66 services to unmarried parents increased by 10.5% while adoption placements reached an all time high: 6,245 adoption orders were completed, an increase of 527 over 1964. Of these children, 69.2% were under 3 years of age. At the same time there was a slight decrease of 2.6% in services provided to families.

From these figures it can be seen that infants admitted from an increased number of unmarried mothers are moving quickly into adoption homes. This means that the increase in child care is adding to the number of older children already in care for whom it is more difficult to plan.

The Societies are attempting to meet the needs of some of these children by extending their group home programs but still have a growing number of children waiting admission to treatment centres and Ontario hospitals.

In view of the experiences of 1965, the provisions contained in the new Child Welfare Act are both timely and encouraging.

Staffing the Children's Aid Societies with qualified social workers continues to be a problem. During the fiscal year the Staff Training Committee of the Ontario Department of Public Welfare and the Association of Children's Aid Societies sponsored three more courses for Children's Aid Society personnel.

These included:

- a Ninth Basic Training Course, with an attendance of 20;
- a Third Advanced Training Course, with an attendance of 24; and
- a First Supervisors' Course, with an attendance of 15.

The basic courses are for Children's Aid personnel with less than one year's job experience and who are not graduate social workers. The Advanced Training Course is for non-graduate social workers with two or more year's job experience, or who are graduates of the above basic courses. The First Supervisors' Course was a distinct success and plans are being made to continue it, along with other courses, as this type of training seems to be directly connected with improvement of service to the public.

On January 1, 1966 the Kawartha-Haliburton Children's Aid Society came into being replacing the Children's Aid Society of Peterborough and the Children's Aid Society of Victoria and Haliburton.

The formation of this newest society is founded on the conviction, of the Boards of directors and the municipal councils concerned, that better service will be available to the total area through a combined operation.

The Children's Institutions Act and The Homes for Retarded Children Act were amended in July 1965 increasing the capital grants for new and acquired buildings. At the same time the operating grant was increased to cover up to 75% of the institutions approved per diem rate. With additional financial assistance available, institutions operating under these Acts are now in a position to admit more privately placed children.

The increase in construction grants has stimulated interest among various groups and organizations throughout the province in providing new and expanding institutional facilities for children requiring specialized services. Over thirty enquiries have been received and at the end of the year several corporations had progressed to the point of making formal application for a grant. These homes as they develop will in time help relieve the present shortage of beds for children requiring institutional care.

The Children's Boarding Homes Act—During the period under review five new homes have been registered under The Children's Boarding Homes Act and one home was closed ending the year with nine approved homes providing care for 117 children. A number of these children are seriously retarded mentally and will eventually be admitted to Ontario hospitals. In the meantime the children's boarding homes are meeting an urgent need.

Maternity Homes—Last year the 13 maternity homes in Ontario provided care for 1,859 unmarried mothers, 119 more than in 1964, this in spite of the fact that there has been no increase in the number of beds available for some years. The increased service has been possible through later admission to the home thus reducing the length of stay.

The number of students admitted to maternity homes has shown a steady increase over the past few years and 1965 was no exception with an additional 16% in this category. To meet the educational needs of the younger unmarried mothers special emphasis is being placed on developing academic programs that will enable them to keep up with their school work. Local Boards of Education in some areas have been most co-operative in this project. In other communities volunteer teachers have given generously of their time.

If the present trend continues the admission policies and programming of the maternity homes will require careful study and possibly revision in order to ensure that each unmarried mother is offered as positive an experience as possible and it may well be that additional facilities will be required in the future to meet an increased need.

Several church groups have already indicated concern. One group is presently conducting a comprehensive survey and will be prepared to sponsor a new institution when the need is demonstrated.

SUMMARY OF ANNUAL STATISTICAL REPORTS OF
CHILDREN'S AID SOCIETIES
Calendar Year 1965

TABLE 1
PROTECTION WORK CASE-LOAD

	Number of Cases	Children Involved
Carried over	8,349	24,038

Supervised by The Child Welfare Branch

DAY NURSERIES BRANCH

During this year there were 423 nurseries under the supervision of this Branch. In the past five years the total has grown by 17%. In the same time the number of first licences issued each year has grown from thirty-seven to fifty-two, or an increase of 41%. This increase in first licences reflects the greatly increased interest throughout the province in nurseries of all types. Up to 1964, the net increase in nurseries had averaged twelve a year, while in 1965 it was thirty-five.

NURSERIES CLOSING DURING THE YEAR:

At the same time, the percentage of nurseries closing each year has shown a decline. Last year thirty-two, or 8%, of nurseries closed. The reasons were as follows:

Premises unsuitable or no longer available	7
Transferred to elementary school board	6
Owner unable to continue	5
Staff untrained	4
Low enrolment	3
Moved to another municipality	2
Miscellaneous	5
	<hr/>
	32

NURSERIES OPERATING WITHOUT A LICENCE:

Every effort is made to discourage nurseries operating without a licence, but it is difficult to reduce the number entirely. On December 31st, 1965, there were twenty-five such nurseries. Fourteen of these were recent applications with only a few children attending each nursery. In six other cases some of the necessary improvements had not yet been made to the buildings. In two nurseries the local zoning by-laws were under revision in order to permit the nursery to continue to operate. Three nurseries were definitely below the standard required, and legal action should be considered if all methods of persuasion are unavailing.

NURSERIES RECEIVING PUBLIC FUNDS:

There has been a 25% increase in the number of nurseries receiving public funds: thirty-three in 1964 and forty-two in 1965. These nurseries are almost evenly divided between the all day program serving the children of working mothers and the half-day program focussing primarily on the need of the children for supervised play, guidance and stimulation. In addition to this increase in nurseries sponsored by municipal by-laws, there has been an increase in enquiries from municipalities considering the possibility of establishing nurseries. In par-

ticular, there is a growing recognition of the welfare function of the half-day nursery located in crowded urban areas where the need of young children for safe, supervised but active play tends to be overlooked.

DAY CARE OF SCHOOL-AGE CHILDREN:

The extension of grants to day care for children up to seven years of age has been helpful to the seven nurseries which are giving this type of care. It is noted that some school trustees are beginning to suggest that day care of young school children might be conveniently carried on as an auxiliary function of the school. The day care program of children from six to ten years of age will be reviewed from time to time with this possibility in mind.

MOOSONEE NURSERY CENTRE

The plans for a community centre in Moosonee include a nursery centre to serve the children who will later be attending both the public and separate schools. The main purpose will be to develop in the children a trust in persons outside their families and an eagerness to learn. English will be fostered so that the children will be prepared for an English curriculum in the school system. It will be considered equally important to engage the interest of the mothers and to develop their trust in public officials. They will, therefore, be encouraged to spend as much time with their children at the nursery as they wish. Opportunities for them to learn English, child care and home-making will be provided.

An important part of the nursery will be a program to train young Indian women to work in nurseries. These will be both local girls and girls from other Indian areas where nurseries will later be established.

In both the United States and British Columbia nurseries have been found to be a vital step in a program of community development for Indians.

COURSES IN PRE-SCHOOL EDUCATION

In 1965 eighty persons completed the Nursery Education Association of Ontario training courses and thirty completed other courses.

Joint action on the part of the Department of Public Welfare, the Nursery Education Association of Ontario and various educational institutions has resulted in the development of a flexible training program. We anticipate that this program will be able to keep pace with the expanding needs of this field.

The graduates of the one year post-graduate course at the University of Toronto and the three year course at Ryerson Polytechnical Institute have the potential for assuming responsible positions in this work. Five universities are participating through their extension departments in preparing young women for the guidance of pre-school children. These courses are given in a variety of ways, as day-time units of six to nine weeks, and as evening courses. They are attracting mature women, mothers of young children, and recent high school and university graduates.

The Canadian Mothercraft Society is adding training as an assistant in a nursery to their basic training in the care of well-babies. Consideration is being given to arranging courses for nursery assistants through Program 5 and the vocational high school courses.

Work in nurseries is attractive to a large percentage of women. As part-time as well as full-time workers are needed, many women of all ages are looking to this field as a vocational outlet.

PREMISES USED FOR NURSERIES

It is of interest to note that, whereas in 1957 there were only four nurseries in the province built for the purpose, there are now twenty-five. One-third of the nurseries are located in churches. Churches of all denominations have made a great contribution to the development of nurseries throughout the province by operating or sponsoring these nurseries.

STANDARDS IN NURSERIES

It has been gratifying to the staff of the Branch to learn through the years that the enforcement of minimum standards of group day care can lead to an improvement far above that legally required. Less than 10% of nurseries are satisfied merely to fulfill the letter of the regulations. The great majority have continually striven to take advantage of everything they can learn about the needs of children in order to enrich the lives of those entrusted to them each day.

MUNICIPAL OFFICIALS

We again gratefully acknowledge the co-operation of the officials of the municipal health, fire and welfare departments of the one hundred municipalities throughout the province in which nurseries are located. It is only through the effectiveness of these officials that proper supervision can be maintained in all types of nursery programs.

FIELD SERVICES BRANCH

The total caseload of the Field Services Branch decreased 2.5 per cent in the course of the fiscal year ending March 31st, 1966. The primary reason for the overall decrease was the 20.9 per cent drop in Old Age Assistance cases resulting from the 70 year age limit on Old Age Security being lowered to 69 on January 1st, 1966. This pattern will continue until Old Age Assistance disappears as the age limit for Old Age Security is reduced progressively to 65 over the next four years. The percentage increase in Disabled Persons' Allowances cases remained approximately the same as last year; the increase in Widows' and Unmarried Women's Allowances caseload was about half of 1965-66; and the Mothers' and Dependent Fathers' Allowances caseload continued to rise sharply, 13.6 per cent compared to 9.7 per cent last year.

	Percentage Change in Caseload	
	Fiscal Year 1965-1966	Fiscal Year 1964-1965
<i>Old Age Assistance</i>	20.9*	2.1..
<i>Blind Persons' Allowances</i>	2.6*	1.4*
<i>Disabled Persons' Allowances</i>	7.2	7.5
<i>Widows' and Unmarried Women's Allowance</i>	11.2	22.5
<i>Mothers' and Dependent Fathers' Allowances</i>	13.6	9.7

*Decrease.

Numerically, the total caseload decreased from 71,918 on March 31st, 1965, to 70,089 on March 31st, 1966. The comparative numbers in each of the programs were as follows:

	March 31st 1966	March 31st 1965
<i>Old Age Assistance</i>	22,584	28,563
<i>Blind Persons' Allowances</i>	1,932	1,984
<i>Disabled Persons' Allowances</i>	20,123	18,772
<i>Widows' and Unmarried Women's Allowances</i>	10,633	9,561
<i>Mothers' and Dependent Blind Persons' allowances</i>	2.6*	1.4*
<i>Fathers' Allowances</i>	14,817	13,038
	-----	-----
	70,089	71,918

Despite the reduction in total caseload the volume of work performed by the Field Staff during the year continued to expand. The number

of calls and visits made totalled 299,189 compared to 290,634 the previous year. Old Age Assistance and Mothers' and Dependent Fathers' cases each accounted for approximately 30 per cent of the total calls. Disabled Persons' Allowances, about 20 per cent; Widows' and Unmarried Women's Allowances, 9 per cent; and the balance were in relation to other programs and services.

The term "average monthly caseload" used in previous reports has come to have little real meaning due to the increasing number of field staff assigned to particular groups of cases. About half of the Mothers' and Dependent Fathers' Allowances caseload, for example, is now served by field workers whose major responsibilities are restricted to these family cases. Their caseloads are comprised of 175 to 200 cases, and in each caseload there appears to be from 30 to 50 families who require varying degrees of counselling and other forms of help beyond the basic income maintenance services.

Of significance also was the establishment of a professional caseload unit in the Toronto Regional Office staffed with graduates of schools of social work and of the new welfare services course offered by Ryerson Polytechnical Institute. At the end of the fiscal year, the unit had been in operation for only five months but it was already making a notable contribution by extending professional help to families with severe interpersonal problems.

It is worthy of note that the differential use of field staff in this manner affords efficient utilization of the available social work and other specialized skills.

The results of another year of operation of the Special Investigating Unit indicates more success than last year in locating deserting fathers and husbands. The Unit conducted 3,247 investigations and located 1,254 men who had deserted their wives and families. This represents 38.6 per cent of the total compared to 25.2 per cent in 1964-65.

The number of cases in which allowances or assistance were suspended or withheld declined from 1,152 to 979, comprised of 468 General Welfare Assistance and 511 Mothers' Allowances cases. It is difficult to give an accurate estimate of the net savings in public assistance funds but they would be substantial in view of the average monthly payments made to families receiving public assistance.

Of the 468 General Welfare Assistance cases where the husband was located and assistance withheld or suspended, the husband was found to be living in the home and fully employed in 140 families or 29.9 per cent; in 13.0 per cent the wife was living in a common-law union with another man; and in 19.7 per cent she was found to be fully employed with sufficient income to maintain the family. These statistics illustrate clearly the need for specialized services to cope with family desertion and the problems associated with it.

Appreciation is expressed to the staff of municipal welfare departments, private social agencies and other governmental and private bodies for the co-operation received in bringing needed welfare services to the people of the Province.

GENERAL WELFARE ASSISTANCE BRANCH

GENERAL WELFARE ASSISTANCE

General Welfare Assistance is the largest program which is administered at the municipal or county level of government. It provides for the granting of immediate assistance, when necessary, to persons and their dependents who are in needy circumstances in the community. The legislation is flexible and enables the local welfare administrator to use his discretion in determining the amounts to be granted for the items as specified in the Regulations, thereby taking into consideration the particular circumstances of each case. This program is primarily designed to assist persons who are temporarily unable to support themselves and their dependents due to illness, desertion, unemployment, etc. When it has been established that financial assistance may be required on a more or less permanent basis, many of these persons have qualified for some form of Provincial Welfare Allowance, i.e., Assistance to the Aged, Assistance to Dependent Fathers, Medical and Hospital Premium Assistance, etc. The municipality is thereby relieved of all financial and administrative responsibility in providing the basic budgetary items for them.

The Provincial Government reimburses the municipality 80% of its expenditures for budgetary and other items of general welfare assistance issued in accordance with the Regulations. The remaining 20% is the responsibility of the municipal or local government with the exception of certain specified items for which the rate of reimbursement is 50%, i.e., prosthetic appliances, rehabilitation services. The cost of General Welfare Assistance required by residents of areas without municipal organization, as well as the administration and servicing costs, are borne by the Provincial Government.

During the fiscal year 1965-66 the Regulations were revised to provide for increased amounts in the pre-added budgets, shelter allowances, special diets, post-sanatorium allowances and incapacitation allowances.

SUPPLEMENTARY AID

This form of assistance to recipients of governmental benefits has continued to gain acceptance from the municipalities.

Where they are faced with high shelter costs or other extraordinary needs, recipients of Old Age Assistance, Old Age Security, Disabled Persons', Blind Persons' or other categorical allowances may be provided with up to \$20.00 per month by their municipality. This is a shareable item with the senior governments.

The total expenditure of the Branch in 1965-66 was \$49,627,133.00. The Provincial share of this expenditure was \$20,805,973.00 with the Federal Government and the municipalities contributing \$22,034,150.00 and \$6,787,000.00, respectively.

COUNTY WELFARE UNITS AND DISTRICT WELFARE

ADMINISTRATION BOARDS

During the fiscal year 1965-66 the following four Counties and three Districts operated their welfare programs on a consolidated basis—Essex, Prince Edward, Welland and Wentworth Counties and Nipissing, Parry Sound and Sudbury Districts. This resulted in the elimination of accounts from 128 separate municipalities. Accounts were submitted by 866 municipalities during the year but this number will be affected as additional consolidated units are established. Experience to date has shown that a consolidated welfare system can make possible a uniformly high standard of service throughout the County, efficiency in administration and financial control, closer co-ordination with the County Children's Aid Society and the utilization of private welfare resources to the fullest extent. Provision is contained in the Department of Public Welfare Act whereby Ontario pays a subsidy equal to 50% of the cost of staff salaries and travelling expenses as approved for the administration of welfare services in a county or in a district having a District Welfare Administration Board, the latter being effective after the first year of operation.

NURSING HOMES

Under the Regulations, provision is made for payment of a Provincial contribution of up to \$115.00 per month towards the maintenance of a person requiring sheltered care in a nursing home and up to \$140.00 per month towards the maintenance of a person requiring nursing services in a nursing home, subject to such nursing homes meeting the requirements of the municipal by-law under which they were licensed.

Number of Persons maintained (March, 1966)	2,288
Expenditure (gross)	\$264,081.00

REHABILITATION

Under the Regulations made under the General Welfare Assistance Act, Rehabilitation Services means the provision of prosthetic appliances or vocational training or retraining. The Province reimburses the municipality 50% of approved expenditures in this connection. This is additional to the specialized services provided by the Rehabilitation Services Branch for the rehabilitation of handicapped persons.

REHABILITATION UNIT FOR MEN OVER 50

During the fiscal year 1965-66 the Unit gave service to 435 men. Of these 154 secured employment, 16 were placed on War Veterans or Welfare Allowances and one was placed in a training course. Rehabilitation service was continued to the other 264 men as deemed appropriate. Since the inception of this program in 1962, this service has been made available to 1,875 men.

MEDICAL AND DENTAL SERVICES

Recipients of General Welfare Assistance and their dependents are provided with medical services from a family physician of their choice, either in their homes or in the physician's office. This was provided through the Medical Welfare Plan under an agreement between the Province and the Ontario Medical Association. During the 1965-66 fiscal year the rate was increased from \$1.25 to \$1.40 per person per month including dependents.

The Regulations also provide for payment for Emergency Dental Services for emergency extractions required by recipients and their dependents, this service being rendered by dentists of their choice.

HOMEMAKERS AND NURSES SERVICES

The growth of Homemakers and Nurses Services has accelerated during the year. More Counties and Municipalities have taken advantage of the legislation to make the services available to the many families and individuals who require this type of care.

REGULATION AMENDMENTS

Certain amendments were made to the Regulations effective April 1st, 1965. The residence requirement was brought in line with that of the General Welfare Assistance Act which made for uniformity. The maximum provincial contribution for a homemaker was increased from \$4 to \$6 a day, and for a nursing visit from \$1.25 to \$2.25 per visit. Income and living expenses were redefined in keeping with other welfare programs. The eight hour restriction was removed and provision made for extended hours between the period from 7 a.m. to 7 p.m.

The amendments were well received by municipal officials as they make for a more flexible program.

HOMEMAKER SERVICE

As reported in the past several years, the emphasis on homemaker assistance has been to meet the crisis or emergency home situation as it develops. Frequently the crisis is a suddenly occurring medical or social problem, illness of the normal mother, desertion or death. A homemaker going into the home, holds the family together and enables the breadwinner to continue on his job knowing that the children are well taken care of. She cares for the home and gives to the children the security, warmth and affection needed to sustain them during the absence of their mother. This can be considered a helping service of the first order and one that goes a long way toward the prevention of family breakdown.

Our homemaker program for the aged has also been expanded during the year.

There are numbers of elderly people who can do many things for themselves and yet are not quite able to cope with the whole responsibility. They are not capable, physically or emotionally, of shouldering the entire load. Yet these same persons, with a little homemaker help for a few hours each day or week, can be made practically self-sufficient. It is now recognized that if an elderly person can be assisted so that he is able to remain in his own familiar setting, he is a more useful member of society and at the same time a happier individual.

Thirty-two Red Cross Homemaker Services and three Visiting Homemaker Associations continue to co-operate with the County and Municipal Officials to provide the service. There are some 790 homemakers employed by these agencies. Where no service is in operation, homemakers can be found through such other channels as Commercial Placement Agencies or the National Employment Service. Of course, in unorganized areas of the province our provincial representative arranges for the assistance.

NURSES SERVICES

Visiting Nurse Service, has prevented many elderly and chronically ill persons from having to enter a hospital or nursing home and has enabled others to leave such institutions at an earlier date.

Increasing numbers of elderly persons have impairments due to cerebrovascular accidents, amputations or fractures of the lower extremities and the like. The visiting nurse has demonstrated by her specialized skill that she can assist the patient to overcome the disability and enable the person to function at a more independent level. Older persons, who in the past, would have been sentenced to live out their remaining years in a wheelchair, have been returned to a more useful and self-sufficient way of life.

The Victorian Order of Nurses and the St. Elizabeth Visiting Nurses Association, are the two approved Visiting Nurse agencies providing the services throughout the province.

CONCLUSION

Homemakers and Nurses Services has proven to be a very effective method to preserve and strengthen family life; as well as maintain elderly persons in their own homes. In many instances, the service required is either that of a homemaker or a nurse and in others a combined service is necessary. Whichever the case, the two services work hand in hand to fulfill the desired purpose.

APPRECIATION

Our thanks are due to the County and Municipal Officials who give us unfailing courtesy and co-operation in our joint efforts to assure that assistance is granted whenever needed.

HOMES FOR THE AGED BRANCH

MUNICIPAL HOMES

During this year, the total number of beds in municipally operated Homes has increased by 455 as a result of opening two new Homes and additions to five existing Homes.

Four new Homes with a total of 725 beds were under construction. One of these was a replacement of an existing Home and the other three were additions to the growing list of Homes.

Also under construction were five additions or extensions to existing Homes which will mean an additional 355 beds.

Plans were being drawn for eight new Homes, two of which will be of the modern segregated type to replace the old congregate type of Home. The other six will be modern segregated care type to be added to the total number of Homes in the Province. These eight Homes will have a total of 693 beds. At the same time, plans were being drawn for additions and extensions to five modern segregated Homes involving a total of 298 beds.

When the above-mentioned program is completed there will only remain five of the original 35 Municipal Homes and of these one already has a new addition which converted it into a semi-segregated Home. The total number of Homes will have increased from 35 to 74 and the total number of beds available from 2,998 to 12,490.

Ten complete new Homes and one addition were also being contemplated.

It is of interest to note that at the end of 1965 approximately 92.4% of the residents in municipally operated Homes were housed in the fully segregated care Homes, 3.8% in semi-segregated Homes and only 3.8% in the old congregate type.

Residents requiring bed or semi-bed care continue to increase in numbers. At the end of 1965, 45.6% of all the residents in the Homes required this type of care compared with 43.7% at the end of 1964. Of the total increase in residents of 643 during 1965, 470 were classified as requiring bed or semi-bed care.

CHARITABLE INSTITUTIONS

Charitable organizations continue to play an important role in providing care for the aged. Six complete new Homes with a bed capacity of 245 were opened in 1965. All six were additions to the

growing number of Homes. Three additions with a total of 300 beds were made to existing Homes.

Five complete new Homes with a total of 828 beds were under construction. Four were replacements of older and smaller Homes, while one was an addition to the growing number of Homes. Two extensions with a total of 51 beds were also under construction.

Plans were being drawn for two new Homes with a total of 296 beds to be added to the total number of Homes while plans were also being drawn for an addition to an existing Home for 75 more beds.

Six complete new Homes and four additions to existing Homes were also being contemplated.

ELDERLY PERSONS' HOUSING

During the year, 296 new complete dwelling units were opened in nine different municipalities.. In six different municipalities 2,778 complete dwelling units were under construction.

Up to the end of the year, 3,535 complete dwelling units have been constructed since the legislation went into effect in 1952.

SUMMARY

With the increasing number of Homes and enlarging of existing Homes, the problem of efficient management has been assuming even greater importance than in the past. To assist the Homes in meeting this problem and to provide improved inspection in the increased number of Homes, this Branch has doubled the number of its Supervisors during the past year. We are now in a better position to give training to new Superintendents, to help Homes in initial stages of operation and to assist them if they run into serious problems.

At the same time the staff of Handicraft Supervisors has been increased and will be further increased to assist the Homes in this important field of activities. A well-organized handicraft program does much to make full and happy lives for the residents.

The program of training Adjuvants to assist in the re-activation of residents suffering from mental and physical handicaps continues at an increased pace. This program has been mentioned in previous reports.

Much preparatory work has been done during the past year to prepare legislation for the establishment of Rest Homes. These are being designed to provide care for various types of handicapped people for whom there are no existing facilities. In other words, they are planned to fill certain grey areas and give specialized nursing care to those whose needs are such that they do not require hospital treatment.

In addition to the increasing number of new Homes being built as shown in the first part of this report, the older Homes are steadily being improved by the addition of such facilities as chapels, auditoriums and craft rooms.

REHABILITATION SERVICES BRANCH

The Rehabilitation Services Branch has continued to provide a comprehensive range of vocational rehabilitation services to an increasing number of handicapped persons. This last year some 2,140 persons were referred for assistance, while a total of 5,123 persons received one or more of the seven basic services authorized under the Act. These include:

(1) Assessment: This initial step involves medical, social and vocational diagnosis to determine:

- (a) the nature and degree of disability;
- (b) the individual's potential and work capacity;
- (c) the need for medical, social and vocational services.

This assessment is undertaken by counsellors of the Branch in consultation with the patient's attending physician and, if necessary, consultation with psychologists, teachers and employers. It may be supplemented by the use of specialized rehabilitation facilities and workshops. New assessment facilities in Hamilton, London and Ottawa have helped to reduce heavy dependence on specialized facilities in Toronto.

(2) Medical Restoration: Since the restoration of the disabled person to his maximum level of employability is the ultimate goal of rehabilitation, provision of medical and related services, such as artificial appliances, is particularly important.

During the year 474 persons were provided with orthopaedic appliances, wheelchairs, hearing aids, drugs, surgery and transportation at a cost of approximately \$83,000. This slight decline from the previous year's figure of 481 does not reflect a declining utilization, but rather a shift of costs to hospital and health insurance.

Nineteen sixty-five was marked by increased use of temporary prostheses fitted sometimes within days of amputation. In Toronto a beginning has been made in immediate post-operative prostheses and these are being considered in Ottawa. Hydraulic units to give more natural knee action are now in fairly common use. Electronic arms have received much publicity but have remained in the experimental stage.

(3) Counselling and Guidance: The key to the rehabilitation program is the guidance and counselling provided through all phases of rehabilitation to help the disabled person select and achieve the right job objective.

To help meet the ever increasing demand for these services, 22 new counsellors and supporting clerical staff were added to the Branch, bringing the total staff complement up to 60. Despite this increase, however, the demands for services continued to outstrip the ability of the Branch to recruit, train and employ counsellors in sufficient numbers.

(4) Vocational Training: Next to assessment and counselling, training continued to be the most extensive service provided and involved an expenditure of approximately \$800,000. At the end of the fiscal year 599 persons were undergoing courses of training.

Clerical and skilled trades continued to be the leading occupations for which training is provided, but an increasing number of semi-skilled and unskilled occupations were also utilized. This reflects the increasing opportunities being provided through the development of occupational training by workshops for persons suffering from mental illness and mental retardation.

(5) Maintenance and Transportation: Another essential service is the provision of maintenance and transportation allowances during training and restoration. Approximately 60 per cent of all trainees receive maintenance allowances. The rates of allowances, which were increased during the previous year, helped substantially to eliminate financial pressures previously experienced by a number of trainees.

(6) Occupational Tools: Equipment and tools which are necessary to enable trainees to obtain a particular job are provided. Barbering, watchmaking and electrical equipment repair continue to be the chief occupations where such help is required.

(7) Placement: The provision of employment is the final goal of vocational rehabilitation. During the year 427 disabled persons were placed directly in employment, while 635 were successfully employed following the provision of medical treatment and artificial appliances.

CO-OPERATION WITH VOLUNTARY AGENCIES AND EXPANSION OF FACILITIES

In addition to the purchase or direct provision of services to the handicapped, the Branch has responsibility for co-ordinating and encouraging rehabilitation facilities operated by private agencies. The need for expansion of these facilities has never been more apparent.

During the past ten years our Department has witnessed a dramatic change in the nature of the rehabilitation problem. When the program

first began, nearly all persons referred to the Branch suffered from physical handicaps. Conventional methods, such as counselling, aptitude testing, physical restoration and vocational training, usually were all that were required to help the individual. Today the picture is radically different. Well over half the clients of the Branch are persons who have mental illness and emotional disturbances. A high proportion of the remaining ones who are physically handicapped also suffer from emotional complications.

To deal with this new population, special techniques and facilities have been required. In particular, workshops are needed in which appropriate assessment and work adjustment training can be provided, together with counselling and job placement services. This experience of the Department is part of a world-wide trend. Through the combined efforts of government and voluntary agencies, expansion of workshops in Europe, United States, Canada, and other parts of the world, has been one of the most striking developments in rehabilitation in the past few years.

In Ontario, the voluntary agencies engaged in providing rehabilitation services have been steadily expanding workshop facilities. The Jewish Vocational Service has doubled its capacity. The Rehabilitation Foundation for the Disabled, the Canadian Mental Health Association, and the Ontario Association for Retarded Children have opened new workshops, while established workshops of the goodwill type have strengthened their assessment and training operations. To assist these developments, the Branch has increased fees for service and has sponsored special programs for the training of workshop supervisors. The most extensive of these was a special training institute sponsored jointly by the Department and the Ontario Association for the Mentally Retarded and held at York University.

To further explore the needs of workshops and to determine how additional assistance might best be given, the Minister's Advisory Committee on Rehabilitation established a special Sub-Committee on Workshops.

VALUE OF REHABILITATION

The extent to which Ontario's rehabilitation program has improved the economic status of handicapped persons and relieved dependency on public assistance has again been shown by the annual survey of a sample of those persons who were rehabilitated following the provision of vocational training and restoration services. The reported earnings of 488 persons rehabilitated in 1966 can safely be estimated at \$1,291,400. Placing this against \$465,620 expended by the Branch, it can readily be seen that in the first year following rehabilitation earnings of the handicapped have been well in excess of costs involved in their rehabilitation.

WELFARE ALLOWANCES BRANCH

The Welfare Allowances Branch is responsible for determining the eligibility of applicants under the various programs administered by the Department for direct assistance to individuals and families. As a general rule, the recipients of financial aid from this Branch require long term service. Immediate and short term assistance is rendered by municipal officials.

Welfare allowances are paid to eligible persons in accordance with legislation for the blind, disabled and aged. Assistance is also available for widows and unmarried women who qualify under the regulations. Families may be granted aid in accordance with The Mothers' Allowances Act or the program for Assistance to Dependent Fathers.

In addition to financial aid, premium-free hospital insurance is provided. Other services include care under the Medical Welfare Plan if a recipient's liquid assets do not exceed \$1,000 if single and \$1,500 if married. This form of premium-free hospital and medical assistance was also provided to approximately 55,000 needy recipients of Old Age Security.

OLD AGE ASSISTANCE

During the year ended March 31, 1966 an average of 24,658 recipients a month received payments, up to a maximum of \$75 a month, totalling \$20,277,079. At the year end there were 19,991 recipients. This represented a decrease from the prior year as 11,464 recipients transferred to Old Age Security.

New applications demonstrated a continued need for this program. Of the 8,556 applications dealt with, 7,244 or 84.7% were approved as eligible.

BLIND PERSONS' ALLOWANCES

An expenditure of \$1,560,887 was made during the fiscal year for allowances to the blind. Payments were made to a monthly average of 1,882 recipients. A review of 284 applications was completed of which 182 or 64.1% were approved.

DISABLED PERSONS' ALLOWANCES

During the year ended March 31, 1966, the number of recipients of this allowance increased by 1,184 persons to 18,406. Payments for the year amounted to \$15,859,977 and were made to an average of 17,840 persons each month.

Of 6,414 applications dealt with during the year, 3,347 (52.2%) were approved. Of the ineligible applications, 2,335 (89.8%) were deemed to be not totally and permanently disabled within the meaning of the regulations.

ASSISTANCE TO WIDOWS AND UNMARRIED WOMEN

This program provides assistance under The General Welfare Assistance Act to widows, unmarried women and certain married women who are at least 60 years of age. An average of 9,328 women received aid up to a maximum of \$75 monthly and payments totalling \$7,903,970 were made for the year ended March 31, 1966.

MOTHERS' AND DEPENDENT FATHERS' ALLOWANCES

During the year there was a monthly average of 9,369 recipients of Mothers' Allowances on whose behalf an expenditure of \$16,227,136 was made.

A further \$6,302,576 was expended under The General Welfare Assistance Act in respect of Assistance to Dependent Fathers to a monthly average of 3,398 families.

In addition to premium-free medical and hospital care, the beneficiaries under these programs also received premium-free dental care in accordance with the terms of the Dental Welfare Plan.

At March 31, 1966, of the 13,621 families receiving assistance, 4,738 had one child, 3,339 had two children and 5,544 had three or more children.

SEE TABLE 27—MOTHERS' ALLOWANCES CASES

SOLDIERS' AID COMMISSION AND THE ONTARIO CANTEEN FUND

The Commission administers the Kathleen Hammond Fund; the purpose of this Fund is to assist widows whose soldier husbands were either killed in action or died as a direct result of their service in World War I.

In 1964 the Ontario Department of Public Welfare carried out a spot check survey of all such widows in Ontario to determine their financial position. This survey brought to light many cases of need and in the year under consideration 149 widows were given financial assistance for a total expenditure of \$12,579.20, an increase over last year of \$4,558.43. The average age of those assisted is 71.

Total financial assistance by the Commission amounted to \$22,801.01. Total number of applications handled was 403.

The Ontario Canteen Fund is restricted to the assistance of Canadian veterans and dependents of the First World War. The dollar value of assistance rendered from this Fund was \$34,369.33 and involved 703 veterans and their dependents.

It would be a mistake to assess the accomplishments of these two Funds by looking at the dollar value of assistance rendered. The Funds under our administration are not used when funds from other sources are available but are used to supplement other aid when that aid is not sufficient to relieve distress. The small staff of three dedicated people are well versed in all forms of assistance that is available to ex-service people and their dependents and no applicant for assistance is turned away unless he has been given specific instructions as to where the aid required may be obtained. Much of the expenditure is to effect needed house repairs. The average age of the World War I veteran is 73 years; he is no longer capable of climbing ladders to make repairs himself.

On behalf of my colleagues, I express appreciation for the reports we obtain through the facilities of the Department of Public Welfare, the Department of Veterans Affairs, the Royal Canadian Legion and other veteran groups. The members of the Medical and Dental professions have been most understanding in reduction of accounts when the financial problem facing individuals has been brought to their attention. Trades people and Finance Companies have been most co-operative when a member of our staff has had to negotiate a settlement.

To secure a true picture of the assistance rendered to 1,109 Ontario residents many hours of negotiation by our staff must be added to the expenditure of \$57,170.34.

REPORT OF THE DEPUTY MINISTER

TO: The Honourable John Yaremko, Q.C.,
Minister of Social and Family Services.

I have the honour to submit herewith the Thirty-Sixth Annual Report of the Department formerly known as The Department of Public Welfare, now known as The Department of Social and Family Services.

This covers the Fiscal Year ending March 31, 1967, and it is respectfully submitted.

A handwritten signature in dark ink, reading "James S. Band." The signature is written in a cursive style with a large, stylized initial "J" and a long, sweeping underline.

James S. Band, Deputy Minister.

CHILD WELFARE BRANCH

With 1966 began the first year of operation under the new Child Welfare Act, 1965. With its emphasis on preventive services in the Act, its requirements of standards of services in the Regulations and its entirely public financing, it marked a year of great change in the children's aid societies. Relieved of the problem of fund raising, many societies were freed to explore new ways of meeting the needs of over 23,000 families and over 18,000 unmarried parents who required guidance and counselling. Some 42 per cent more new cases of married parents and 4 per cent more new unmarried mothers requested service than in the previous year.

As a result, there was an 11 per cent increase in admissions of children to the care of the societies and a 6 per cent increase in adoption placements by the societies. The increase in days of care provided amounted to 13 per cent, with a very marked growth—over 100 per cent—in days of care provided for non-wards. This is a direct reflection of the abolition in the new Act of residence requirements and, hence, maintenance paid by the local municipality for the child of the unmarried mother. With the Province paying 100 per cent of the costs of care and maintenance for all children in care of unmarried mothers, the need for Court Hearings declined sharply. With more children in care, and often more difficult children to care for, new resources had to be found and 1966 produced a steady growth in group homes. As a means of caring for older children who find the pressures of normal family living too great, but who are not in need of the more intensive and more costly institutional care for disturbed children, group homes have proved to be an invaluable help for over 315 children.

With ever-expanding demands for service, the problems of providing adequate numbers of qualified personnel continued and were intensified in 1966. With classification of all social work staff required in the Regulations of the new Act, a more orderly and accurate record of employed staff and their deployment in the societies is possible. In spite of the increased demands for service noted, the total personnel of the societies increased during 1966 by 26 per cent with only 11 per cent increase in social work staff.

The Children's Aid Society of Hamilton-Wentworth and the Catholic Children's Aid Society of Hamilton-Wentworth began operating throughout the County of Wentworth plus the City of Hamilton in 1966, thus reducing the number of societies to 53. Extensive consultations have been carried on in several areas in an effort to consolidate uneconomic administrative units to reduce costs and provide better services to the citizens.

Group meetings were held in the fall with the local directors of the children's aid societies and in January, 1967, for the first time, with the directors of the Institutions for Children and Youth.

The Children's Institutions Act was amended in 1966 to increase the subsidy from 50 per cent to 75 per cent and facilities for the Retarded are now provided under The Homes for Retarded Persons Act. Several institutions for children were rescheduled under The Children's Institutions Act as their services were strengthened to provide for more disturbed children and two new facilities for the retarded child opened. A large number of enquiries to establish new facilities for youth and for retarded children continue. Plans are well advanced for the building of a new maternity home, the first in thirty years, in an effort to meet an apparently increasing need.

With the development of more community facilities for training personnel to fill the variety of positions available in the field of child welfare, a major obstacle is being overcome in the advance towards improving quality of services. Greatly increased liaison through the Inter-departmental Committees for the Retarded and for Services for Children with Mental and Emotional Disorders augurs well for the many children with severe problems of adjustment, and for the institutions and societies who struggle with their day-to-day care.

SUMMARY OF ANNUAL STATISTICAL REPORTS OF CHILDREN'S AID SOCIETIES Calendar Year 1966

TABLE I
PROTECTION WORK CASE-LOAD

	Number of Cases	Children Involved
Receiving Service January 1st 1966	8,128	22,458

DAY NURSERIES BRANCH

During this period, four hundred and seventy-six nurseries were under the supervision of the Branch. Eight-five of these were new applications, as compared with sixty-seven new applications the previous year.

The field staff was increased from four to eight during this period, in order to keep up with the increasing number of applications and enquiries.

The Nursery Education Association continued to be helpful to the Branch by encouraging various educational institutions to offer training courses in early childhood education. The Association also instituted in 1966 a voluntary system of certification of pre-school teachers. This certificate has been useful to persons seeking employment in nurseries, and to persons engaging personnel to work with young children. All field staff of the Branch have qualified for this certificate.

Five additional nurseries became eligible to receive public funds during this period.

In co-operation with the Women's Bureau, the Branch spent considerable time exploring the possibilities of industry-based day nurseries. Several firms expressing an interest were interviewed. The consensus was that it would be preferable to operate nurseries under community auspices, either public or private, so that all children needing the service would be eligible, not simply those whose mothers accepted employment in particular plants.

Riverdale Hospital has continued to operate its nursery, but no other hospital has yet followed its example. Many nurseries, teachers, and other highly-trained women are making use of existing public and private facilities. It would appear that it is only under exceptional circumstances that employer-operated nurseries would seem to be required.

There is still no simple answer to the question of establishing the need for a day nursery in a particular area. The availability of work, alternative forms of child care and the climate of opinion are all factors best assessed at the local level. Local organizations and private citizens aware of specific needs for day care services should make them known to their municipal welfare officer. The Branch is always ready with advice and assistance in the actual planning and operating of nurseries under either public or private auspices.

There has been increasing emphasis on the quality of the care offered in licensed nurseries. Widespread availability of training courses has made it possible for nurseries to secure better trained personnel when staff changes occur. In many nurseries, staff have attended summer and evening courses. It has been very gratifying to the field supervisors to see the improvement in nursery programs following these courses. Increased understanding of the nature and needs of young children has given the staff more interest and satisfaction in their work. This in turn has been followed by heightened responsiveness and enthusiasm from the children.

Leaflets issued by the Branch on equipment and program in all types of nurseries have been in great demand. They are distributed freely in Ontario, and sample sets have been requested from all other provinces of Canada, as well as most of the American states.

A notable feature of the nursery program is the effort to give the parent a better understanding of the needs of children. In many nurseries, parents actually take part as assistants to the staff. In other nurseries, individual and group conferences are held regularly with the parents.

The passing of the Day Nurseries Act by the Ontario Legislature in June, 1966, was the highlight of the year for this Branch. It was recognized at once that the basic long-range approach to implementing this Act would be renewed effort to increase training facilities in early childhood education throughout the Province. Efforts in this direction have been so successful that it is likely that between three to four hundred young women will complete various types of courses in the spring of 1969.

The continued co-operation of municipal fire, health, zoning and welfare officials has made possible for the staff of the Branch to keep in close touch with nurseries throughout the year.

FIELD SERVICES BRANCH

As the fiscal year ending March 31st, 1967, came to a close the Field Services Branch faced an unprecedented demand for service with the proclamation of the Family Benefits Legislation and the commencement of the Ontario Legal Aid plan. Since the Family Benefits program includes a much broader range of persons eligible for public assistance at the provincial level than the former Welfare Allowances Legislation a very high initial demand for new applications to be completed was anticipated plus a greater ongoing number of new applicants throughout the year. The needs testing responsibility assigned to the Department under the Ontario Legal Aid plan is to a large degree carried out by Field Services staff. Included in this responsibility are the interviewing of all persons referred to the Department by Area Directors of Legal Aid to determine their financial and related circumstances and, on the basis of the information compiled, to make a recommendation to the Area Director as to each applicant's ability to pay all, some part or no part of the cost of legal services required. To meet these new requirements over 100 additional personnel were expected to be recruited, trained and absorbed into the Branch during the next fiscal year.

Reflecting the substantial drop in the number of Old Age Assistance cases, the total caseload of the Field Services Branch decreased numerically from 70,089 to 66,164 during the course of the year, a decrease of 5.6 per cent. The comparative numbers and percentage changes in each of the programs were as follows:

	Numbers in Caseloads	
	March 31st 1967	March 31st 1966
<i>Old Age Assistance</i>	14,922	22,584
<i>Blind Persons' Allowances</i>	1,843	1,932
<i>Disabled Persons' Allowances</i>	21,262	20,123
<i>Widows' and Unmarried Women's Allowances</i>	10,938	10,633
<i>Mothers' and Dependent</i>		
<i>Fathers' Allowances</i>	17,199	14,817
	66,164	70,089

	Percentage Changes in Caseloads	
	Fiscal Year 1966-1967	Fiscal Year 1965-1966
<i>Old Age Assistance</i>	33.9*	20.9*
<i>Blind Persons' Allowances</i>	4.1*	2.6*
<i>Disabled Persons' Allowances</i>	5.7	7.2..
<i>Widows' and Unmarried Women's Allowances</i>	2.9	11.2
<i>Mothers' and Dependent Fathers' Allowances</i>	16.1	13.6
*Decrease.		

The substantial decrease in Old Age Assistance cases resulted from the reduction of the qualifying age for Old Age Security from 69 to 68 on January 1st, 1967 and the decrease in Blind Allowances appears also to be attributable to this factor

The increase in the Disabled Persons' caseload was less than the previous year while the increase in the Widows and Unmarried Women's cases was only about one-quarter of that in 1965-1966. This program seems to have stabilized at about the three per cent increase level in its fourth year of operation.

Most significant is the continuing rapid growth of the Mothers' and Dependent Fathers' caseload, 16.1 per cent this year compared to 13.6 per cent in 1965-1966. It can be anticipated that the broader qualifying provisions of the Family Benefits Legislation for family cases will accelerate this growth.

In providing service to applicants, recipients and the population at large, the staff of the Field Services Branch made 298,849 calls or visits in 1966-1967, slightly lower than the previous year when 299,189 were made. The proportion of Field Staff time spent on family cases is illustrated by the fact 34 per cent of the calls or visits made were to families compared to 30 per cent the previous year. It should be emphasized as well that, because of the more complicated circumstances, such calls or visits usually entail a longer period of time per call than do those for single persons.

Old Age Assistance and Blind Persons' Allowances cases were responsible for 23.9 per cent of the calls; Disabled Persons' Allowances, 20.6 per cent; Widows' and Unmarried Women's Allowances, 9.4 per cent; and 12.1 per cent were in relation to other programs and services of the Department.

Reference was made in last year's report to the professional case-work unit which had been established in the Toronto Regional office. Throughout 1966-1967 this specialized unit continued to provide a setting where family counselling was provided to 250 families. About half of this number required professional help in overcoming or adjusting

to serious psycho-social problems while the balance were counselled in relation to difficulties at the environmental level such as physical illness, household budgeting, home management, job placement and so on. Another activity of note performed by the Unit was a nine-session group counselling project conducted with 37 mothers receiving allowances in which family hygiene, nutrition, household maintenance, school attendance and child rearing practices were discussed with the discussion being led by qualified specialists.

Two other specialized areas in which staff of the Toronto Regional office participated were the St. James Tower project — a coordinated service by a number of different social agencies for individuals and families being relocated from a redeveloped area in the downtown area of the city and the provision of a supplementary information and counselling service to the extensive Italian community. These activities along with a continuing emphasis on services of all kinds to supplement income maintenance payments are indicative of the trend to a comprehensive program of social and family services. This was highlighted by the announcement made by the Department of its intention to establish a Family Services Branch to develop and coordinate professional and other supportive services.

The Special Investigating Unit has as its main purpose the location of fathers and husbands who have deserted their families. The Unit conducted 3,557 investigations and located 1,263 deserters or 35.5 per cent of the total, slightly less than the percentage located in 1965-1966.

The number of cases in which allowances were suspended or withheld declined to 935 or 26.3 per cent of those located. Nonetheless this represents a very substantial saving in public assistance funds which might otherwise have been expended to families who did not qualify. In over one-third of the General Welfare Assistance cases where assistance was suspended or withheld, for example, the husband was found to be living in the home and fully employed. Desertion or alleged desertions, therefore, continue to be one of the most serious and difficult aspects of public social services administration.

To the staffs of municipal welfare departments, private social agencies, other departments of the government and all who cooperate with personnel of the Branch throughout Ontario to care for those in need we express our sincere thanks.

GENERAL WELFARE ASSISTANCE BRANCH

GENERAL WELFARE ASSISTANCE

General Welfare Assistance is the largest program which is administered at the municipal or county level of government. It provides for the granting of immediate assistance, when necessary, to persons and their dependents who are in needy circumstances in the community. The legislation is flexible and enables the local welfare administrator to use his discretion in determining the amounts to be granted for the items as specified in the Regulations, thereby taking into consideration the particular circumstances of each case. This program is primarily designed to assist persons who are temporarily unable to support themselves and their dependents due to illness, desertion, unemployment, etc. When it has been established that financial assistance may be required on a more or less permanent basis, many of these persons have qualified for some form of Provincial Welfare Allowance, i.e. Assistance to the Aged, Assistance to Dependent Fathers, Medical and Hospital Premium Assistance, etc. The municipality is thereby relieved of all financial and administrative responsibility in providing the basic budgetary items for them.

The Provincial Government reimburses the municipality 80% of its expenditures for budgetary and other items of general welfare assistance issued in accordance with the Regulations. The remaining 20% is the responsibility of the municipal or local government with the exception of certain specified items for which the rate of reimbursement is 50%, i.e. prosthetic appliances, rehabilitation services. The cost of General Welfare Assistance required by residents of areas without municipal organization, as well as the administration and servicing costs, are borne by the Provincial Government.

SUPPLEMENTARY AID

This form of assistance to recipients of governmental benefits has continued to gain acceptance from the municipalities.

Where they are faced with high shelter costs or other extraordinary needs, recipients of Old Age Assistance, Old Age Security, Disabled Persons', Blind Persons' or other categorical allowances may be provided with up to \$20.00 per month by their municipality. This is a shareable item with the senior governments.

The total expenditure of the Branch in 1966-67 was \$53,325,073. The Provincial share of this expenditure was \$19,180,129.00 with the Federal Government and the municipalities contributing \$26,732,405.00 and \$7,412,539.00 respectively.

COUNTY WELFARE UNITS AND DISTRICT WELFARE ADMINISTRATION BOARDS

During the fiscal year 1966-67 the following seven Counties and five Districts operated their welfare programs on a consolidated basis—Essex, Prince Edward, Welland, Simcoe, Wellington, Victoria and Wentworth Counties; and Nipissing, Rainy River, Algoma, Parry Sound and Sudbury Districts. This resulted in the elimination of accounts from 232 municipalities. Accounts were submitted by 824 individual municipalities during the year but this number will be affected as additional consolidated units are established. Experience to date has shown that a consolidated welfare system can make possible a uniformly high standard of service throughout the County or District, efficiency in administration and financial control, closer co-ordination with the local Children's Aid Society and the utilization of private welfare resources to the fullest extent. Commencing January 1, 1967, provision is contained in The General Welfare Assistance Act and Regulations whereby Ontario pays a subsidy equal to 50% of the cost of staff salaries and travelling expenses as approved for the administration of welfare services in a county having a County Welfare Unit or in a District having a District Welfare Administration Board, subsidy to the latter being effective after the first year of operation. Under The District Welfare Administration Boards Act, provision is made for a special grant by Ontario during the first year of operation of a Welfare Board for establishment purposes.

NURSING HOMES

Under the Regulations, provision is made for payment of a Provincial contribution of up to \$115.00 per month towards the maintenance of a person requiring sheltered care in a nursing home, and up to \$140.00 per month towards the maintenance of a person requiring nursing services in a nursing home, subject to such nursing homes meeting the requirements of the municipal by-law under which they were licensed.

Number of Persons maintained (March, 1967)	3,283
Expenditure (gross)	\$336,343.00

REHABILITATION:

Under the Regulations made under The General Welfare Assistance Act, Rehabilitation Services means the provision of prosthetic appliances or vocational training or retraining. The Province reimburses the municipality 50% of approved expenditures in this connection. This is additional to the specialized services provided by the Rehabilitation Services Branch for the rehabilitation of handicapped persons.

REHABILITATION UNIT FOR MEN OVER 50

During the fiscal year 1966-67 the Unit gave service to 440 men. Of these 164 secured employment. Rehabilitation service was continued to the other 276 men as deemed appropriate. Since the inception of this program in 1962, this service has been made available to 2,317 men.

MEDICAL AND DENTAL SERVICES:

Recipients of General Welfare Assistance and their dependents are provided with medical services from a family physician of their choice either in their homes or in the physician's office. This was provided through the Medical Welfare Plan under an agreement between the Province and the Ontario Medical Association until April 1, 1966. On the latter date the Ontario Medical Services Insurance Plan became effective in respect to beneficiaries under The General Welfare Assistance Act and Regulations.

The Regulations also provide for payment for Emergency Dental Services for emergency extractions required by recipients and their dependents, this service being rendered by dentists of their choice.

HOMEMAKERS AND NURSES SERVICES

The Homemakers and Nurses Services program continues as one of the basic resources for preserving home and family life. Since it was first introduced, interest has focused on meeting emergency situations that arise in a home during the temporary absence, illness or convalescence of the mother.

Municipalities continue to purchase service on a fee-for-service arrangement from the three Visiting Homemakers Associations of Toronto, Hamilton and Ottawa and from thirty-two branches of the Canadian Red Cross Society giving service throughout the province.

During the year "teaching homemaker" projects were initiated in the Cities of Kingston, Ottawa and Belleville. Homemakers are employed by the municipality to go into the home of Public Assistance recipients and teach the mother by demonstration, basic housekeeping skills. She gives instruction in home management, cooking, sewing, shopping and child care. She develops good family relations within the home and generally teaches the family to help themselves.

We have received favourable results from this method of home instruction. Other municipalities have shown interest in the program and there is every indication of further developments to bring the supportive service to families on public assistance who are unable to function normally.

Much of the homemaker assistance given to elderly people is directed toward keeping them in their own homes. Such duties as light cleaning, laundry, shopping, preparation of a hot meal, some personal and beside care a few hours each day or week is all that is required to enable them to remain at home.

Visiting Nurse Service in the home, likewise has continued to increase. This allows for home visits by a registered nurse, to administer a skilled nursing procedure on the order of the attending physician, to ill, disabled, handicapped or elderly persons. The service is purchased on a fee-for-service basis from two St. Elizabeth Visiting Nurse Associations and fifty-one branches of the Victorian Order of Nurses throughout the province.

Our staff maintains a close working relationship with Municipal Welfare Officers and the personnel of private Agencies throughout the province. We express our sincere appreciation for the co-operation received from the group during the year.

HOMEMAKERS AND NURSES SERVICES

HOMEMAKERS AND NURSES SERVICES

Total Hours		48,793	20.70					

HOMES FOR THE AGED BRANCH

MUNICIPAL HOMES

During this period, the total number of beds in municipally operated Homes has increased by 759 as a result of opening three new Homes and additions or extensions to five existing Homes.

Seven new Homes with a total of 684 beds were under construction. Two of these were replacements of existing Homes and the other five were additions to the growing list of Homes.

Also under construction were eight additions and/or extensions to existing Homes which will mean an additional 675 beds.

Plans were being drawn for five new Homes, one of which will be a modern segregated care type of Home to replace an old congregate care type and the other four will be modern segregated care type of Homes to be added to the total number in the Province. These five Homes will have a total of 548 beds. At the same time plans were being drawn for additions and/or extensions to three modern segregated type of Homes involving a total of 218 beds.

When the above mentioned program is completed there will only remain 4 of the original 35 Municipal Homes. The total number of Homes will have increased from 35 to 73 and the total number of beds available from 2,998 to 13,617.

Ten complete new Homes, eight additions and/or extensions to existing Homes, ten Rest Homes and one Geriatric Centre were also being contemplated.

During the year under review The Homes for the Aged Act was amended and the name of the Act was changed to The Homes for the Aged and Rest Homes Act. As indicated by the new name, the Act has been amended to include Rest Homes which will receive capital grants and operating subsidies on the same scale as the Homes for the Aged.

These Rest Homes will enlarge the scope of care being given to residents 60 years of age and over and also provide care for people 21 years of age and over who require care in a Rest Home. The Honourable Minister can authorize admission of special cases who have not yet reached the above-mentioned age.

This new program has been received with much interest by the municipalities.

CHARITABLE INSTITUTIONS

Charitable Institutions continue to play an important role in providing care for the aged. It would appear that, as a result of a change in The Charitable Institutions Act during the year under review whereby the capital construction grants were doubled from \$2,500.00 per bed to \$5,000.00 per bed, they will play an even more important role in the future. This will be discussed later. .

Four complete new Homes with a bed capacity of 402 were opened in 1966. One added to the list of Homes and three were replacements on a larger scale of existing Homes.

One addition of 38 beds was made to an existing Home.

Three complete new Homes with a total of 719 beds were under construction. Two were replacements of older and smaller Homes, while one was an addition to the growing number of Homes. Three additions and/or extensions with a total of 121 beds were also under construction.

Plans were being drawn for three complete new Homes with a total of 397 beds to be added to the total number of Homes while plans were also being drawn for two additions and/or extensions with a total of 17 beds to the existing Homes.

Twenty-seven complete new Homes and seven additions and/or extensions to existing Homes were also being contemplated. The two preceding remarkably large figures undoubtedly reflect the response of Charitable Organizations to the doubling of the capital cost grants on the part of the Provincial Government to such organizations.

ELDERLY PERSONS' HOUSING

499 new complete dwelling units were opened in five different municipalities during the year, 2,795 complete dwelling units in two different municipalities were under construction.

Up to the end of the year 4,034 complete dwelling units have been constructed since the legislation went into effect in 1952.

SUMMARY

Facilities in the Branch for assisting the increasing number of Homes have been enlarged during the past year. More Welfare Institution Supervisors and Handicraft Supervisors have been taken on to provide in the training of new Superintendents, to help Homes during the opening period, to assist them if they run into problems and, lastly, to inspect them to see that the Acts and Regulations are being carried out.

OFFICE ON AGING

THE POPULATION

Increases in the Ontario population since the 1901 census reflect steady growth. (Percentage gain in population for each ten-year period appears to the right of the light shaded portion of bars in Chart:.) Lowest gain was in the decade of the depression (1941 census). Following the post-war marriage and baby bonus, as well as the entry of immigrants into the Province, the rate of growth has greatly accelerated. The percentage gain 1951-1961 was the largest of this century.

Growth of our aged population has been equally noticeable. We now have in Ontario (1966) more than 811,850 men and women over 60, another 567,722 over 65, and 368,516 over 70 years of age.

Average life expectancy at birth is now 68.3 years for males and 74.4 years for women; at age 45 the rates are 27.8 and 32.6 years for males and females, respectively. It is also well to remember that women tend to survive men for longer periods. In the Provincial population women comprise 50.0 per cent of the total; by age 60 and over 54.4 per cent, and by age 70 and over 57.4 per cent of this group are women.

The percentage change in the actual proportion of older persons in Ontario is of interest. Advance figures for Ontario from the DBS 1966 Census of Canada, indicate that between 1901 and 1966, the proportion of persons in younger ages declined, whereas the proportion of older persons increased startlingly. This is shown in Table 1.

For the five-year period, 1961-1966, however, the percentage change in the proportion of older persons was much less startling and the proportion of those under 20 years of age showed a modest increase. Further changes for Ontario and the rest of Canada will depend on complex demographic variables:—fertility rates, birth rates, death rates and migration.

Men and women over 65 years of age now make up 8.2 per cent of the population. This ratio is typical of the major Metropolitan areas. Certain rapidly urbanizing regions, of course, are younger—Halton-Peel counties, for example, with just about 5 per cent of their population over 65. This low ratio of aged persons holds true for northern districts as well though for different reasons. Among the regions with a high ratio of aged persons, Victoria and Grey-Bruce are prominent.

For Canada as a whole the average proportion is 7.7 per cent. Provinces with a younger population are Newfoundland (5.9 per cent) and

Quebec (6.1 per cent.) The Yukon and Territories have only 3.0 per cent. Prince Edward Island (10.8 per cent) and British Columbia (9.5 per cent) have higher ratios over 65 years of age.

In keeping with most Western industrial nations Canada as a whole has been more conscious of the aged in the population; aware of them in both absolute and relative terms. Officially this cognizance has long been expressed in a variety of programs and services in Ontario. Of more significance is the fact that in recent years this awareness has become more widespread and more personal. The aged are not seen as merely a minority or problem group but as a part of the human condition. Aging is truly everyone's concern: the aged are all of us—tomorrow.

THE OFFICE

Administratively this report covers the first full year of the Branch's operations. Structurally and functionally the Branch has been on the move for some years. From 1964 on it served as the secretariat for the Legislative Assembly Select Committee on Aging—a three-party Committee of 14 members of the Legislature who in February, 1967, submitted their Final Recommendations to the House (Sessional Paper 82, 5th Session, 27th Legislature, 15-16 Elizabeth II). Clarification of the role of the Office on Aging was set forth by the Minister in the Department's Brief to the Select Committee (December, 1965).

Appreciation is expressed to the Chairman and Members of that Legislative Select Committee for their friendly and challenging interest during public hearings on a complex matter; also to the numerous other governmental and private bodies for their co-operation in supplying information, advice and criticism. All told some 180 visits were made by the Select Committee across Ontario, five other Canadian provinces, Washington, D.C., and several states.

With the completion of the work of the Ontario Select Committee on Aging, work is underway to transfer files and activities to the proposed Ontario Interdepartmental and Advisory Council on Aging, for which body the Office on Aging is again to serve as the secretariat and research arm. A major task for this proposed Council or Committee will be to recommend ways and means of implementing the Recommendations of the Select Committee as well as strengthening interdepartmental co-operation. In keeping with the recommendations of at least three groups, the following Departments will definitely be included: Health, Education cum University Affairs, the Ontario Housing Corporation, the Ontario Human Rights Commission and this Department.

RESEARCH

Long-Term Study of Aging, 1959-1979

This longitudinal research project has been underway since 1959. Some 2,000 male volunteers in their mid-40's started the study and by 1979 it is estimated 1,150 men will still be participating. The first five year analyses will be published in due course but are showing significant trends in the social, medical and economic aspects of the men's lives. Additional cross-sectional studies are being planned.

The purpose of the twenty-year Longitudinal Study is to observe the socio-economic and health changes that accompany aging, the various adjustments that men make as they get closer to retirement, and the effectiveness of all services for the aged. Subjects are interviewed annually, and include a representative sample from all walks of life and every region of Ontario.

In this particular project, one of a relatively few longitudinal research undertakings in gerontology, appreciation is expressed to the participants for their support and to the Field Services Branch for interviewing.

As in previous years the Branch is providing a variety of specialized statistical services using a small data processing unit. Assistance was given, for example, to one of the geriatric projects recommended by the Minister's Advisory Committee on Geriatric Studies; namely, Dr. G. Aguzzi et al's "Prevalence and Type of Obstructive Broncho-pulmonary Disease in the Very Old," published in the Canadian Medical Association Journal, April, 1966.

Work is progressing on a Bibliography of Canadian Research Publications in the field of aging—in conjunction with development of the J. W. Crane Memorial Library of Gerontology and Geriatrics. This was a direct outgrowth of the Ontario Conference on University Education Related to Aging and The Teaching of Professional Skills in the Field of Gerontology (Osler Hall, Academy of Medicine, Toronto, March 26, 1965), co-sponsored by this Department, the then Select Committee, the Ontario Department of University Affairs, the Ontario Geriatrics Research Society, and the Ontario Welfare Council—Section on Aging.

In addition to consultant services and teaching for a number of agencies and institutions, the Office on Aging has developed sampling techniques for the annual survey of the General Welfare Assistance caseload and the several categorical programs of the Welfare Allowance Branch—with particular studies of the caseload for Assistance to Widows and Unmarried Women.

ELDERLY PERSONS' CENTRES

For a number of years local committees have had a variety of clubs and drop in centres for the aged in Ontario. Most notably these were established by religious, fraternal and voluntary agencies in Ottawa, London, Toronto and Windsor—to cite but a few.

Following The Elderly Persons' Social and Recreational Centres Act, 1961-62, grants-in-aid for capital purposes have been made available to some of these original centres as they expanded and to other newer facilities. The location of these centres is shown in Table 4.

During the 1966 Session The Elderly Persons' Centres Act was passed and plans are underway to expand grants-in-aid for administration costs and specialized services. Enquiries have been received from numerous municipalities and organizations. At present plans are under development for at least five new centres—of which the largest will be the Baycrest Day Care Centre, Toronto.

Senior Citizens' Club and Centre	Brantford

particularly persons suffering from mental and emotional handicaps. Conventional methods, such as counselling and vocational training, are no longer all that are required to help such individuals, and to deal effectively with them, special techniques and facilities, particularly sheltered workshops, are required.

Rehabilitation workshops are becoming more and more recognized as necessary facilities. By providing for work assessment, work training, and when necessary, long-term sheltered employment, they make possible the rehabilitation of many who might otherwise be unable to return to gainful employment. The encouragement and expansion of such workshops was one of the major reasons for the passing of the Vocational Rehabilitation Services Act, 1966. For the first time the Branch will be enabled to support workshops through the provision of capital and operating grants, as well as fees for service.

CO-OPERATION WITH VOLUNTARY AGENCIES

The partnership of the Department with voluntary agencies in the field of rehabilitation continues to be a most successful one. The financial difficulties encountered by many of the voluntary organizations will, we hope, be reduced by the newly inaugurated program of assistance. The Branch will be working hand-in-hand with all types of voluntary organizations to provide increased facilities and increased standards of service to the disabled. Not until the rehabilitation program becomes a continuous whole, from hospital to employment, from dependency on welfare to self-sufficiency, and from despair to hope for the future, can we say that the job is done.

VALUE OF REHABILITATION

The extent to which Ontario's rehabilitation program has improved the economic status of handicapped persons and relieved dependency on public assistance has again been shown by the annual survey of a sample of those persons who were rehabilitated following the provision of vocational training and restoration services. The reported earnings of 541 persons rehabilitated in 1967 can be safely estimated at \$1,350,000. Placing this against the \$731,341 expended by the Branch on their behalf, it can readily be seen that in the first year following rehabilitation earnings of the handicapped have been well in excess of costs involved in their rehabilitation.

WELFARE ALLOWANCES BRANCH

WELFARE ALLOWANCES BRANCH

During the year ended March 31, 1967, expenditures of \$67,613,113 were made under the various programs administered by the Branch. Direct assistance was paid to blind, aged and disabled individuals, and to widows, unmarried women, mothers and dependent fathers.

Premium-free hospital insurance was provided by the Department to those recipients whose liquid assets were within the \$1,000 maximum if single, and \$1,500 if married. Medical care under the Ontario Medical Services Insurance Plan, which came into being April 1, 1967, was made available to recipients of welfare allowances. In addition, these health benefits were extended to approximately 70,955 recipients of Old Age Security.

The legislation administered by this Branch provides for the establishment of a Medical Advisory Board. This Board is now composed of three qualified physicians. In addition to determining the eligibility for an allowance, the members review the medical problems on individual cases and refer them to our Rehabilitation Services Branch.

OLD AGE ASSISTANCE

A monthly average of 17,981 persons received payments up to a maximum of \$75 a month during the fiscal year. This accounted for an expenditure of \$14,579,104. As the qualifying age for Old Age Security was lowered the number of new applications decreased to 6,351. Of this number 5,277 or 83.1% were approved for payment.

BLIND PERSONS' ALLOWANCES

At the year-end expenditures in respect of allowances to blind persons amounted to \$1,451,993. The Branch dealt with 235 new applications of which 156 or 66.4% were approved. Of the remainder 68.7% were not considered blind within the meaning of the Regulations.

DISABLED PERSONS' ALLOWANCES

The number of recipients of Disabled Persons' Allowances increased by 7.9% over the previous year. Expenditures of \$16,839,099 were made to a monthly average of 19,252 recipients.

New applications were received on behalf of 6,169 persons. Of

this amount, 3,050 (49.4%) were approved and 2,550 (41.3%) were declared ineligible. For those not qualifying the most frequent reason (90.5%) was failure to meet the disability requirement as set out in the Regulations under the Disabled Persons Act (Canada).

ASSISTANCE TO WIDOWS AND UNMARRIED WOMEN

The sum of \$8,552,250 was disbursed to recipients of Widows Allowance during the year ending March 31, 1967. This amount represents payments to a monthly average of 10,192 women and an increase of 9.3% over the last fiscal year.

New applications were received at the average rate of 262 a month. Of these 83.4% were approved.

MOTHERS AND DEPENDENT FATHERS ALLOWANCES

Beneficiaries under The Mothers Allowances Act received aid totalling \$19,273,859 during the fiscal year under review. Payments were made to a monthly average of 10,990 recipients on behalf of 36,600 beneficiaries.

A further \$6,916,808 was expended under The General Welfare Assistance Act in respect of dependent father cases to a monthly average of 3,638 recipients involving 16,854 beneficiaries.

In addition to premium free hospital and medical insurance, dental care under the Dental Welfare Plan was extended to all beneficiaries in the mothers and dependent fathers group.

During the past year a system has been devised whereby deserted mothers may sign a form which permits the Court to forward payments from the deserting husband directly to this Department. The mother will receive an amount of financial assistance which excludes this income from the calculation. In this way she is able to budget monthly expenditure on the basis of a pre-determined amount of income.

SEE TABLE 27 — MOTHERS' ALLOWANCES CASES

SOLDIERS' AID COMMISSION AND THE ONTARIO CANTEEN FUND

As a matter of economy the funds of the Soldiers' Aid Commission and the Ontario Canteen Fund are operated as a single agency to relieve the distress of veterans of the First World War and their dependents.

It is the opinion of the administrators of the funds that the monies that are available should only be used when no other source of assistance is available to the applicant. The monies administered by the Soldiers' Aid Commission are bequests left as one benefactor stated in her will "to be used for the assistance of war widows in need." The fund administered by the Ontario Canteen Fund is money accumulated as profits of the Canadian Expeditionary Forces Canteens of World War I. This money is administered by trustees for the Ontario veterans of the first war. These are not public funds and the administrators consider that it is their task to relieve distress be it actual or mental strain caused by a mounting debt. For the reasons stated it is sometimes considered justifiable to accept accounts that are not legally collectable to relieve the mind of an aging veteran or a veteran's widow. It is in this field that our small staff of two renders its most valuable service.

In the year under consideration commercial and medical accounts totalling \$10,552.81 were negotiated to settlement at \$4,754.80. By co-operation with other Veteran Welfare Funds indebtedness of \$80,008.26 was settled at a cost to our funds of \$11,636.85.

In the years 1927 and 1929 the Trustees of the Ontario Canteen Fund received a total of \$1,031,381.05. Since that time \$3,136,003.71 has been provided in assistance to World War I veterans or their dependents.

In summary, 921 applications have been received in the year under consideration, 817 have been accepted and assistance granted at a total expenditure of \$62,118.57.

It is with regret that we record the passing of Commissioner G. R. Johnston and of Eric Seaman who for many years was the very able secretary of the funds.

PERSONNEL BRANCH

On April 1, 1966 the complement for the Department was increased from 776 to 865 employees. In the early part of 1967 the complement received a further boost of 55 to allow some advanced staffing in anticipation of the requirements to meet the Canada Assistance Plan. Therefore in the latter part of the 1966-67 fiscal year the total complement for the Department was 920.

STAFFING

1. Hires

The Personnel Office concentrated its efforts on the staffing function during this period to assist the operating branches with their objectives and to be in the best possible position for the anticipated future staff expansion. The staffing activity resulted in the hiring of 212 people representing 127 additional and 85 replacement staff. Included in these figures is the addition of 32 Field Workers, 17 transfers to the Department from other Departments and two new Directors, namely, Director of Indian Development and Director of Training and Staff Development.

2. Terminations

As indicated by our staff replacements' figure, the Department had a total of 85 terminations. Only 6 employees transferred to other Departments and fortunately only 2 employees died while on staff. The Department's turnover of 9.9 per cent remained below the Government average. The majority of the turnover came in the clerical areas.

3. Promotions

A total of 150 promotions were processed for personnel of the Department with a variety of job classifications involved.

PAY AND CLASSIFICATION

In April, negotiations commenced with all Departments to determine those classifications which would be allocated to the Management Group or to the Bargaining Group represented by the Ontario Civil Service Association. This necessitated a review of all of the applications of our 95 classifications on the basis of a pre-determined three point formula. This also necessitated a method of reviewing decisions on existing and new positions.

As the fiscal year progressed numerous reviews of positions were carried out with some changes in classification resulting. Much activity was generated in this area due to the expansion of staff and extension of services. The classification area produced nine new classifications during the year bringing our total to 104 classes. Many of the new positions were allocated to existing classifications.

Even though all classifications were not scheduled for a salary revision during the 1966-67 fiscal year, all of the Department's personnel received salary increases as a result of revisions to the salary ranges.

Negotiations for Social and Welfare Workers started in May and as a result of a settlement at the mediation stage, employees in these classes received significant salary increases totalling 15 to 25 per cent. The awards were granted in two stages, namely, April 1 and October 1, 1966. On October 1, 1966 the Professional Classes represented in part by the Departmental Accountant series and Executive Officer series, etc. received a two step interim increase. On January 1, 1967 the clerical and operational series received the second part of a salary award resulting in a one step increase. The first part of this award had been granted one year earlier. Pressures on salaries as reflected in all areas of the economy had their effect on our negotiations and all of personnel will have their salary ranges reviewed in the 1967-68 fiscal year.

While the 1966-67 fiscal year was an active one for the Personnel Branch, increased service can be expected in the coming fiscal year.

REPORT OF THE DEPUTY MINISTER

To: The Honourable John Yaremko, Q.C.,
Minister of Social and Family Services.

I have the honour to submit herewith the Thirty-Seventh Annual Report of the Department of Social and Family Services.

This Report covers the Fiscal Year ending March 31st, 1968, during which our Department continued to progress in terms of expanded and improved social services. The year also marked the successful implementation of new legislation and we look forward with confidence to bringing their benefits to the people of Ontario.

This Thirty-Seventh Annual Report is respectfully submitted.

A handwritten signature in dark ink, reading "James S. Band". The signature is fluid and cursive, with the first name "James" and last name "Band" clearly legible.

James S. Band,
Deputy Minister.

CHILD WELFARE BRANCH

The calendar year 1967 continued to be one of further growth and development in the Children's Aid Societies of the Province, although growth patterns began to show some significant changes.

Whereas 1966 showed an increase of some 42 per cent in numbers of requests for guidance, counselling and other services from married parents, the increase of 1967 over 1966 had slowed to 7 per cent. The increase in numbers of unmarried mothers continued, however, with 9 per cent more requesting services compared to 1966's 4 per cent increase.

The decline in growth in protection work had its effect on numbers of children admitted to care, the increase in 1967 being only 308 children or 2.8 per cent, compared with 1,041 more children in 1966, an increase of some 11 per cent over those admitted the previous year.

At the same time the rate of placement of children on adoption continued to show consistent growth, with 4,873 children so placed by the Children's Aid Societies, another 6 per cent increase, as it was in 1966. In total, 6,884 children had their adoptions completed in 1967, with 76 per cent of these placed by the Societies, 15 per cent being related children and only 9 per cent being privately placed—the proportion of private placements steadily decreasing as confidence in Society placements continues to grow.

To provide these services the numbers of personnel increased by a further 15 per cent, following 1966's phenomenal 26 per cent increase and, for the first time, the total Children's Aid Society personnel exceeded 2,000, reaching 2,180 by the year's end.

All of these services cost, in total, over \$31,828,000, or 23 per cent more than the year before, with the Province paying 72 per cent of the total, reflecting the legislative change in its proportionate share that became effective April 1st, 1967.

During 1967, the Port Arthur Children's Aid Society and the Fort William Children's Aid Society completed negotiations towards the merger of their two Societies and on January 1st, 1968, the Children's Aid Society of the District of Thunder Bay came into being, further reducing the number of Children's Aid Societies to 52.

In the field of institutions for Children and Youth there was an increase in numbers of residents in the Schedules 2 and 4 Homes of The Charitable Institutions Act, and an increase of 54 percent in the total residents of Homes for Retarded Persons in 1967. Plans are well-advanced for several new institutions for children and, in particular, for institutions for the retarded that should be effected next year.

At the end of 1967, Miss Veronica Franck, the Assistant Director of Child Welfare, retired after 20 years in the public service.

DAY NURSERIES BRANCH

During 1967-68, 476 nurseries were under the supervision of the Branch, 85 of them being new applications this year, as compared with 67 new applications in the previous year.

The passing of The DAY NURSERIES ACT, 1966 was an important milestone in the history of the Branch. It has paved the way for an expansion and extension of the work of the Branch in the following ways.

- (1) Municipalities may now be re-imbursed 80 per cent of net operating costs.
- (2) Costs of renovation of property for municipal nurseries are also re-imbursed 80 per cent. The municipality is required to provide the initial equipment for setting up the nursery.
- (3) Municipalities are empowered to purchase service from private nurseries on behalf of persons in need. Net costs of this service are also shareable on the 20-80 formula.
- (4) The province may operate nurseries in unorganized territories. This provision will be used mainly for providing services to Indian children. Indian bands may also be approved to operate nurseries and receive 80 per cent of net cost.
- (5) The provisions for enforcing the legislation were strengthened, so that the 2 per cent of nurseries which have been reluctant to meet the regulations may be dealt with more effectively.

During this year the staff of the Branch increased from twelve to sixteen persons to accommodate the increasing number of nurseries.

MOOSONEE NURSERY CENTRE

This nursery opened in September, 1967, in former public school premises. It demonstrated the benefit to Indian children arising from group programs. Much valuable experience is being gained here that will ultimately be to the advantage of many Indian children and their families.

BOOKLET ON THE ROLE OF THE CHURCH IN PROVIDING NURSERY SERVICES

One of the leading churches in Canada issued, with some assistance from the Day Nurseries Branch, a booklet urging its congregations to make their premises available on a non-denominational basis for programs for young children through the week. This booklet is being widely distributed among all denominations and is encouraging many churches to open their doors for day nurseries and nursery schools.

TRAINING PROGRAMS FOR STAFFS OF NURSERIES

The Department has encouraged the development of courses in early childhood education to assure an increasing supply of competent women to staff the day nurseries and nursery schools.

A three-part extension course under the auspices of the Nursery Education Association of Ontario is offered in ten universities or Colleges of Applied Arts and Technology in the form of summer courses, evening courses, or short daytime courses. These extension courses are specifically designed to attract mature married women whose children are in school and who wish to seek employment again, possibly on a part-time basis. About 40 students will be completing these courses in the spring of 1968. Approximately one-third of all nurseries in Ontario are half-day schools requiring only part-time staff.

One university post-graduate two-year course, one three-year course at Ryerson Polytechnical Institute, and a two-year course at nine Colleges of Applied Arts and Technology will be graduating approximately 64 students in Early Childhood Development in 1968 and 300 students in 1969. These courses are given in areas covering the entire province.

In addition, two universities are considering establishing an undergraduate course in Early Childhood Education, and three Colleges of Applied Arts and Technology are in the process of developing a two-year course.

TWENTY YEARS OF LICENSING

The licensing program in Ontario has now been in operation for twenty years. While public funds have been paid to only about ten per cent of the nurseries, the other ninety per cent have received supervision, encouragement and practical help in conducting programs beneficial to the children in their charge. British Columbia was until recently the only other province exercising control over day care programs, and Nova Scotia has now passed legislation on this matter. Licensing is important because a good nursery is expensive to operate, a poor one can be lucrative for the owner. The person or Board in charge of a nursery must be enabled to appreciate good quality care for children. Pride in providing such care, even above the minimum standard required for a licence, has been fostered in many cases.

OBJECTIVES AND GOALS OF NURSERIES SUPERVISED BY THE BRANCH

The nurseries themselves have the following objectives in planning their programs for young children:

- (1) to provide sufficient safe space to permit natural healthful, spontaneous activity on the part of children, to promote optimum physical development;
- (2) to provide a wide variety of play materials so that young children may have plenty of opportunity to learn about the world around them;
- (3) to give constant but unobtrusive supervision to the social, emotional, and mental development of each child; he must increase in ability to look after himself and at the same time to inter-act happily with other children and with adults outside his own family;
- (4) to assist the parents to a better understanding of their children's needs and how to meet them.

These aims are common to all nurseries but they are carried out a little differently in some settings or additional aims are incorporated into some programs. For instance, the day nursery must adjust its hours to meet the needs of the mothers as well as of the children; some nurseries emphasize the teaching of religion or a

DAY NURSERIES

second language. A wide latitude in the nature of the program is permitted under the Day Nurseries Regulations, as long as the basic needs of the children are being met.

The nursery co-operatively organized by a group of parents is a case in point. The co-operative nursery makes extraordinary demands on the director. She has the dual task of planning a suitable program for the children and of giving the mothers the necessary skills to act as her assistants in carrying out the program. The rewards for staff, parents and children in the co-operative nursery are correspondingly great. Mothers feel that the skills they learn in the nursery give them greater confidence in home guidance. The children flourish in an atmosphere where mothers and teachers work in harmony, and the teachers have the satisfaction of knowing that their influence on the children is being carried into the home. They also gain confidence from working in close partnership with the mothers.

In reviewing the work of the Branch during this period, it should be appreciated that the effect of the new Act had not yet been reflected in an increase in the number of nurseries in operation. Nevertheless, later in the year there was a great increase in enquiries from local municipalities and groups, and there were indications that a marked increase in the number of publicly supported nurseries could be expected. The sections of the Act providing for support of municipally operated nurseries and the sections permitting agreements between private nurseries and municipalities are attracting much favourable attention.

The continued co-operation of municipal welfare, health and fire authorities was greatly appreciated during the change-over period, and it was felt that a good foundation had been prepared for an expected rapid increase in the number of publicly supported nurseries.

FIELD SERVICES BRANCH

With the proclamation of The Family Benefits Act on April 1st, 1967, and the coincident inauguration of The Ontario Legal Aid Plan the demands on Field Services personnel and facilities were extremely heavy for the entire year. That the staff was able to cope with up to 1,500 referrals a day in the early months is a tribute to their dedication, as was their willingness to work six days a week where necessary and to delay vacations until the work was completed.

FAMILY BENEFITS

As was predicted in the report for the previous year, the broader range of persons eligible for financial assistance from the Province under the new Family Benefits program brought hundreds of enquiries daily seeking information about the program and thousands of requests for applications to be taken. In the course of the year 28,744 new applications were completed with a large majority being done at the request of municipalities on behalf of persons and families already receiving public assistance locally. By the end of the year new Family Benefits cases plus those transferred from the former Welfare Allowances programs accounted for 90.6 per cent of the total Field Services caseload.

The rapid transformation from Welfare Allowances to Family Benefits is illustrated in the following tables. At March 31st, 1967 there were 66,164 active and pending Welfare Allowance cases:

	<u>Numbers in Caseload</u>	<u>Percent of Total</u>
Old Age Assistance	14,922	22.6
Blind Persons' Allowances	1,843	2.8
Disabled Persons' Allowances	21,262	32.1
Widows and Unmarried Women's Allowances	10,938	16.5
Mothers' and Dependent Fathers' Allowances	<u>17,199</u>	<u>26.0</u>
Welfare Allowances—Total	<u>66,164</u>	<u>100.0</u>

At March 31st, 1968, the composition of the caseload was:

FIELD SERVICES

	<u>Numbers in Caseload</u>	<u>Percent of Total</u>
Family Benefits		
Dependent Children Cases	24,722	35.4
Single Persons Cases	33,631	48.2
Married Persons Cases	4,887	7.0
Sub-Total	63,240	90.6
Welfare Allowances	6,595	9.4
Total	69,835	100.0

Of particular significance to the Branch is the continuing rapid increase in the number of families with dependent children, both in absolute numbers and as a percentage of the whole. In 1965-1966, 14,817 families accounted for 21.1 percent of the total; in 1966-67, 17,199 families, for 26.0 percent; and in 1967-1968, 24,794* families, for 35.0 per cent. To highlight this trend it is noted the combined caseload increased by 3,671 while families with dependent children increased by 7,595. Accounting largely for the decrease in the number of single and married persons were transfers to Old Age Security at age 67 beginning January 1st, 1968, compared to age 68 in the previous year.

LEGAL AID ASSESSMENT

With the introduction of the Ontario Legal Aid Plan on March 29th, 1967, referrals from Legal Aid Area Directors to this Department began immediately. Our responsibility in relation to the plan is limited to assessing the needs of persons referred to us and making a recommendation to an Area Director as to whether the applicant can pay no part, some part or all of the cost of legal services required.

The interviewing of applicants and the making of a large majority of the recommendations were carried out by personnel of the Field Services Branch in Regional Offices and only those cases with unusual circumstances were referred to the Legal Aid Unit of the Family Benefits Branch for review and decision.

To handle the uneven volume of requests across the Province, it was necessary to adapt the staffing and administration of the needs testing service to local demand. In Toronto, for example, which had nearly half of the total number of persons referred, a separate unit with full-time staff was established and located in the same offices as the Area Director for Legal Aid; in areas served from Regional Offices such as Barrie and Wingham it was added as a further duty of the normal field services operation.

From the date of inception to the end of the first full fiscal year, 51,169 persons were referred for legal aid assessment. Initially, there were a number of problems in handling the large number of requests promptly, but these were gradually straightened out as experience was gained.

*This number includes 72 families still qualifying for a Welfare Allowance.

FIELD SERVICES

SPECIAL INVESTIGATIONS UNIT

This Unit conducted a total of 4,404 investigations into the whereabouts of deserting husbands and putative fathers who were not contributing towards the support of their families. 1,809 investigations or 41 percent of the Unit's total cases resulted in the successful location of the absent fathers. This number of locations represents a substantial increase of 30.2 percent over the number of locations made during the 1966-1967 period when only 1,263 successful searches were effected.

In concluding this report it is acknowledged the emphasis for the year was to accommodate and integrate the new programs and services into the organization and structure of the Branch. Nonetheless, improving the quality of service continued to be stressed, both in the recruitment of personnel with higher qualifications and upgrading of those already employed through in-service training and educational leave and a more thorough assessment of the needs of those seeking help.

Over 363,000 visits were made to the homes of applicants, recipients and community resources by the field staff to fulfil their responsibilities, an increase of 17.7 percent over 1966-1967.

Appreciation is expressed for the continuing co-operation of other concerned persons and agencies, both public and private. These groups, and indeed the community as a whole, appeared to have welcomed the new Family Benefits Act. It is hoped the same positive trends that have been evidenced in the past year will continue to develop towards our mutual goal of bringing greater comfort and personal satisfaction into the lives of the clients and community we serve.

FAMILY BENEFITS BRANCH

On April 1, 1967, a new programme of financial assistance was introduced in Ontario. The Family Benefits Act, which became effective on that date, provides financial aid and other benefits to persons who are in need by reason of age, disability, permanent unemployability or loss of the principal family provider. The new programme takes into consideration the financial needs of the family as a unit.

In the first weeks of operation of The Family Benefits Act a review was made of the files of all those receiving allowances under The Old Age Assistance Act. The Blind Persons' Allowances Act, The Disabled Persons' Allowances Act, The Mothers' Allowances Act and the programmes of Assistance to Widows and Unmarried Women and Assistance to Dependent Fathers. Those who would benefit by the new legislation had their cases transferred to the Family Benefits programme. There remained those who would receive less or who would not be eligible for an allowance under The Family Benefits Act, usually as a result of substantial liquid assets. By the end of the fiscal year, 6,656 persons were still receiving categorical allowances while 55,238 individuals and families were being assisted under The Family Benefits Act.

A review of the Family Benefits caseload at March 31, 1968, indicated that of the 55,238 recipients 29,579 were single and 25,659 were living in family situations. Of the single group, 12,218 were elderly persons, and 17,361 were blind or otherwise disabled. With regard to the family situations, 17,179 represented mothers with children; the majority of these were widows, but deserted, divorced and unwed mothers were also receiving aid.

Two-parent families were eligible and in receipt of benefits where the father was deemed to be unemployable for medical reasons. There were 4,283 families in this group. Many of these cases were reviewed for possible referral to the Vocational Rehabilitation Services Branch.

Unfortunately, many of the single disabled recipients, because of the nature of their handicaps, will not be able to enter the labour force. A high percentage of these live with parents or relatives who act as trustees in the administration of the allowance.

At the end of the fiscal year under review there were 1,350 cases of allowances being paid to foster mothers. Very often these were the grandmother or aunt of a child who had been orphaned.

In determining need, consideration is given to liquid assets, budgetary needs and income. An applicant may have liquid assets in an amount which is equal to not more than \$1,000 plus \$200 for each dependant, plus \$300 for a spouse over 60 years of age. The amount of assistance which will be provided is based on pre-determined amounts for food, clothing, utilities, household supplies and personal items. Other needs such as shelter, fuel and special diets are also taken into consideration.

FAMILY BENEFITS

Income which might be available to the applicant from other sources is taken into account. Certain portions of earnings from salaries or wages are exempt as an incentive to the beneficiary to become self-supporting. The earnings exemptions vary with the size of the family.

In addition to financial aid, health benefits are available to certain recipients. Premium-free medical and hospital coverage is extended to most recipients and their dependants and dental services are provided to families with children.

Hospital and medical benefits are available to needy Old Age Security recipients. Single pensioners with an annual income of \$1,700 or less and married pensioners with an annual income of \$3,000 or less qualify for benefits free of charge. If the applicant's income is more than these amounts, it is compared with his budgetary requirements. The liquid asset limitation previously mentioned applies to this group.

The Department has made arrangements whereby the deserted wife may have maintenance payments, which are received through the Family Court, assigned to the Provincial Treasurer. The family is then provided with an allowance which does not vary if payments from the husband are not forthcoming.

The Regulations under The Family Benefits Act also make provision for the payment of an allowance on behalf of a child who is deformed as a result of the use of the drug Thalidomide. Allowances are paid to 18 families and the children are now reaching the age when they would be entering schools. Requests for an allowance of this type are submitted to a committee, comprised of certain senior Departmental officials, including the Medical Consultant.

The Family Benefits Branch is organized under a director, an assistant director and a staff of supervisors. Each supervisor has a unit consisting of one or more assistant supervisors, a number of clerical staff, stenographers and typists. Each unit deals with a specific aspect of the Family Benefits programme.

When an applicant is required to submit a medical report in support of his application, the report is reviewed by the Medical Advisory Board. This board consists of a chairman and two members, all of whom are qualified physicians. It is the Board's responsibility to express an opinion on the applicant's eligibility for benefits on medical grounds.

The budget for the Family Benefits Branch for the fiscal year ended March 31, 1968 was \$106,236,000. The interest shown in the programme has resulted in 28,744 applications being received. Of these, 19,388 were deemed to be persons in need. The average monthly amount dispersed to recipients was \$128.55. Information on the programme is provided and applications are taken in the 19 regional offices which form the Field Services Branch.

LEGAL AID ASSESSMENT

During the year the Family Benefits Branch has been responsible for the needs assessment of certain applicants for Legal Aid. The applications for Legal Aid are processed by Field Services Branch. Statistics were maintained in the Family Benefits Branch. A new Branch was formed in April, 1968 to administer the Department's responsibilities in the Legal Aid Plan.

For information on Field Services and the preparation of applications, see page 22.

MUNICIPAL WELFARE ADMINISTRATION BRANCH

GENERAL WELFARE ASSISTANCE

This year saw important improvements in the General Welfare Assistance legislation which are of benefit both to the recipients of aid and to the municipalities administering the program. Following amendments to The General Welfare Assistance Act, a new set of Regulations was written, effective April 1, 1967. The rates of subsidizable allowances for recipients were increased and for the first time the municipalities were offered a subsidy on their welfare administration costs. A new range of services called "Special Assistance" was established on which the municipalities could receive subsidy. This includes the cost of additional items of aid such as: prescribed drugs, dental and optical services, prosthetic devices, transportation, vocational training, comfort allowances to nursing home residents as well as funerals and burials. The residence qualifications were changed and a number of other improvements were implemented to broaden the scope and efficiency of the program.

The provincial Government continues to reimburse the municipality 80% of its expenditures for "General Assistance", i.e. living allowances, nursing home costs and Supplementary Aid. A 50% subsidy is paid on municipal welfare administration costs where there is a County or District welfare system. Other municipalities with a full-time Welfare Administrator receive 50% of the amount by which current costs exceed the costs in the base year of 1964. A 50% subsidy is also payable on the costs of items of Special Assistance.

General Welfare Assistance is the largest social service program administered at the municipal level of government. The municipality is required to grant immediate assistance to persons and their dependents who are residents of that community and in need. The new Regulations define a person in need as one "who by reason of inability to obtain regular employment, loss of the principal family provider, illness, disability or age" is unable to provide for himself or his dependents. The emergency and relatively short term cases requiring a living allowance are assisted on this municipal program while the long term cases are usually transferable under The Family Benefits Act to provincial responsibility.

COUNTY WELFARE UNITS AND DISTRICT WELFARE ADMINISTRATION BOARDS

Municipalities may administer their welfare programs individually or join with other municipalities to form County Units or District Boards.

During the fiscal year 1967-68 the following eight County and five Districts operated their welfare programs on a consolidated basis—Essex, Kent, Prince Edward, Simcoe, Victoria, Welland, Wellington and Wentworth Counties and Algoma, Nipissing, Parry Sound, Rainy River and Sudbury Districts. This resulted in the elimination of accounts from 254 separated municipalities.

GENERAL WELFARE ASSISTANCE

It may not be possible for smaller municipalities to put into effect all of the welfare programs and services which are provided under our Provincial legislation. However, when these programs are administered on a County or District basis, they can be made available to residents therein who require them. Experience to date has shown that a consolidated welfare system can make possible a uniformly high standard of service throughout the County or District, efficiency in administration and financial control and closer co-ordination with other agencies such as Children's Aid Societies, Family Courts, Manpower Centres, etc. According to provisions in The General Welfare Assistance Act, Ontario pays a subsidy equal to 50% of the cost of staff salaries and travelling expenses as approved for the administration of welfare services in a County or in a District having a District Welfare Administration Board, the latter being effective after the first year of operation.

COMPONENT PROGRAMS

In addition to living allowances (designated as "General Assistance") other components of The General Welfare Assistance Act are: Nursing Home Care, Supplementary Aid, Special Assistance and Medical Services.

Nursing Home Care is a payment by municipalities to cover wholly or partially the cost of maintaining a person in a private, licenced, nursing home. The new Regulations permit a provincial subsidy of 80% of the municipal expenditure up to a maximum rate of \$8.50 per day of care. Subsidy is also available where the municipality grants the resident a "comfort allowance" of up to \$15 monthly.

Number of persons maintained (March, 1968)—3,111.

Supplementary Aid is a municipal payment to persons already receiving other governmental allowances. If they have high shelter costs or extraordinary needs, the municipality may grant up to \$20 per month per person and receive provincial subsidy of 80%.

Persons eligible include those receiving an Old Age Security pension or any form of Family Benefits.

Numbers of persons assisted (March, 1968)—4,864.

Special Assistance has been described above. These various items to assist in rehabilitation, health care and other needs are paid for at the discretion of the Municipal Welfare Administrator. The rate of subsidy is 50%. In the current year a total subsidy of \$680,870 was granted to municipalities.

Medical and Hospital Services are now covered by the Ontario Hospital Services Commission (O.H.S.C.) and Ontario Medical Insurance Services (O.M.S.I.P.). A recipient of General Assistance is granted O.M.S.I.P. without charge so that he can obtain medical services from the physician of his choice. He may also be granted O.H.S.C. without charge to insure the person or family against the costs of hospital care. Related costs, as for prescribed drugs or dental care, are items of Special Assistance.

In consequence of the improvements in legislation, the name of the General Welfare Assistance Branch was changed to the Municipal Welfare Administration Branch.

HOMEMAKERS AND NURSES SERVICES

The Homemakers and Nurses Services program continues to demonstrate the Department's awareness of the need for "home care services" to families where the normal mother is unable to care for her home and children, and to disabled, handicapped or elderly persons living in their own homes.

Municipalities either employ the homemakers or purchase the service on a fee-for-service basis from three Visiting Homemakers Associations and thirty-two Branches of the Canadian Red Cross Society. This is an invaluable service when a medical or family crisis or problem develops in the home. A homemaker going into the home holds the family together and enables the breadwinner to continue on his job, knowing that the children are well taken care of, and in many instances hastens the recovery of the ill mother.

It has been found that a homemaker with her specialized housekeeping skills can be used to great advantage to instruct the mother on how to manage a household, teach her better buying habits, to give instruction about nutrition and cooking, to help her to improve her home in ways that do not involve money, and show her how to better care for her home and children. Most of all, the homemaker brings a word of encouragement, the sound of hope in an atmosphere of futility.

The "teaching homemaker" concept initiated last year has been enlarged upon. Provision is made in Section 17 of The General Welfare Assistance Act, which enables a municipality to employ "teaching homemakers". The Province shares in this municipal expenditure.

The municipalities of Kingston, Ottawa, Belleville, Hamilton, Metropolitan Toronto and Sault Ste. Marie are providing this kind of service to persons already in receipt of public assistance.

NURSES SERVICES

Visiting nurses service enables many handicapped, disabled, elderly and chronically ill persons to remain in their own home for extended periods of time, before it becomes necessary to place them in a Nursing Home, Charitable Institution or Home for the Aged.

The Victorian Order of Nurses and the St. Elizabeth Visiting Nurse Association are the two visiting nurse organizations who provide the service throughout the Province.

APPRECIATION

The staff continue to maintain a close working relationship with municipalities and private organizations providing services. We appreciate most sincerely their unfailing courtesy and co-operation.

HOMES FOR THE AGED BRANCH

MUNICIPAL HOMES

During 1967 the total number of beds in municipally-operated Homes increased by 1,104 as a result of opening seven new Homes and additions to eight existing Homes.

Six new Homes with a total of 714 beds were under construction. One of these was a replacement of an existing Home and the other five were additions to the growing list of new Homes for the Aged.

Also under construction were four extensions to existing Homes which will mean an additional 325 beds.

Plans were being drawn for two new Homes, both of which will be modern segregated care type of Homes to be added to the total number in the Province. These two Homes will have a total of 542 beds. At the same time plans were being drawn for additions to four modern segregated care type of Homes involving a total of 324 beds.

When this program is completed only 4 of the original 35 congregate care Municipal Homes will remain. The total number of Homes will have increased from 35 to 76 and the total number of beds available from 2,998 to 14,530.

Plans were being drawn for two Rest Homes with a total of 130 beds.

Seven complete new Homes, two additions to existing Homes, and some other centres were also being contemplated.

With a net increase of 1,104 beds and five complete new Homes added to the burgeoning list, the year 1967 has produced a record increase for any one year since THE HOMES FOR THE AGED ACT went into effect in 1949.

CHARITABLE INSTITUTIONS

The impetus to the construction program of Charitable Institutions, begun in the previous year as a result of doubling the capital construction grants to \$5,000 a bed, continues.

Two complete new Homes with a bed capacity of 296 were opened in 1967. Both added to the list of Homes.

Additions of 129 beds were made to four existing Homes.

Six complete new Homes with a total of 1,166 beds were under construction. Two were replacements of older and smaller Homes, while four were additions to the growing number of Homes. One small addition of 7 beds to an existing Home was also under construction.

Plans were being drawn for six complete new Homes with a total of 785 beds. Two of these Homes are replacements of older and smaller Homes, while four

HOMES FOR THE AGED

were additions. Plans were also being drawn for an addition of twelve beds to an existing Home.

Seventeen complete new Homes and three additions to existing Homes were also being contemplated.

The beds in the Homes under construction during the year represent approximately 20% of all the beds in new Homes and additions constructed during the previous 17 years since THE CHARITABLE INSTITUTIONS ACT went into effect.

GENERAL

Continued gains have been made in areas of administrative techniques, staffing and the provision of services to the Homes, both Municipal and Charitable.

Refinements in design standards and the improvement of physical plant continue apace.

Responsibility for outright grants-in-aid under THE ELDERLY PERSONS' HOUSING AID ACT was transferred to the Ontario Housing Corporation, Department of Trade and Development. The reports of the Corporation would contain current figures on new senior citizens housing starts.

For 1967 the co-operation of Staff, Home Physicians, Adjuvants, Auxiliaries, Board and Committee members has been indeed appreciated.

OFFICE ON AGING

OFFICE ON AGING

THE POPULATION

The rate of increase of our aging population in Ontario still exceeds that of our general population due to increased ability to control the communicable diseases. We had in Ontario in 1966 more than 811,850 men and women over 60, 567,722 over 65, and 368,516 over 70 years of age.

The general population growth has shown steady increases since the 1901 census. Lowest gain was in the depression decade, (1941 census). Following the post-war marriage and baby booms, as well as the entry of immigrants into the Province, the rate of growth has greatly accelerated. The percentage gain 1951-1961 was the largest of this century.

Average life expectancy at birth is now 68.3 years for males and 74.4 years for women; at age 45 the rates are 27.8 and 32.6 years for males and females, respectively. It is also well to remember that women tend to survive men for longer periods. In the Provincial population, women comprise 50.0 percent of the total; by age 60 and over, 54.4 percent, and by age 70 and over 57.4 percent of this group are women.

The percentage change in the actual proportion of older persons in Ontario is of interest. Figures for Ontario from the DBS 1966 Census of Canada, indicate that between 1901 and 1966 the proportion of persons in younger ages declined, whereas, the proportion of older persons increased startlingly. This is shown in Table 1.

For the five-year period, 1961-1966, however, the percentage change in the proportion of older persons was less startling and the proportion of those under 20 years of age showed a modest increase. Further changes for Ontario and the rest of Canada will depend on complex demographic variables: — fertility rates, birth rates, death rates and migration.

Men and women over 65 years of age now make up 8.2 percent of the population. This ratio is typical of the major Metropolitan areas. Certain rapidly urbanizing regions, of course, are younger — Halton-Peel counties, for example, with just about 5 percent of their population over 65. This low ratio of aged persons holds true for northern districts as well, though for different reasons. Among the regions with a high ratio of aged persons, Victoria and Grey-Bruce are prominent.

For Canada as a whole the average proportion is 7.7 percent. Provinces with a younger population are Newfoundland, (5.9 percent), and Quebec, (6.1 percent). The Yukon and Territories have only 3.0 percent. Prince Edward Island, (10.8 percent), and British Columbia, (9.5 percent), have higher ratios over 65 years of age.

In keeping with most Western industrial nations, Canada as a whole, has been more conscious of the aged in the population, aware of them in both absolute and relative terms. Officially this cognizance has long been expressed in a variety of programs and services in Ontario. Of more significance is the fact that in recent

years this awareness has become more widespread and more personal. The aged are not seen as merely a minority or problem but as a part of the human condition. Aging is truly everyone's concern: the aged are all of us — tomorrow.

THE OFFICE

The Office on Aging is a Branch which undertakes research, evaluation and dissemination of data on aging and the aged in our society. Studies may range over economic needs and resources of the aged, employment and retirement, including preparation for retirement, community needs and care, specialized environmental studies, community services of a wide variety, including recreation and life-time learning, sociology of family life, and basic research.

The Branch also has responsibility for co-ordinating a number of activities, of which the most significant is the work of the Interdepartmental Advisory Committee on Aging, (with the following Departments, among others, involved: Agriculture and Food, Education, Health, the Ontario Housing Corporation, Labour—Human Rights Commission, Social and Family Services, and University Affairs, together with four knowledgeable citizens from outside the public service).

Liaison is maintained between the Office on Aging and several key agencies and associations. The following are the principal ones concerned: Ontario Geriatrics Research Society; Ontario Welfare Council—Section on Aging; Canadian Welfare Council—Division on Aging; the U.S. Gerontological Society, and the American Geriatrics Society. With several of these organizations, a staff person or associate is actively involved.

RESEARCH

LONG-TERM STUDY OF AGING

1959-1979

A Twenty-Year Study of Aging, begun in 1959 with some 2,000 male volunteers in their mid-40's participating, has 1,500 continuing to participate in 1968. Analyses, based upon information gathered in the study's first ten years, will be published in due course. Additional cross-sectional studies are planned. Graduate students from the University of Toronto's Department of Social Service have already found this study and other information resources of the Office on Aging useful in their studies.

The purpose of the twenty-year longitudinal study is to observe the socio-economic and health changes that accompany aging, the various adjustments that men make as they get closer to retirement, and the effectiveness of all services for the aged. Subjects are interviewed annually, and include a representative sample from all walks of life and every region of Ontario.

In this particular project, one of a relatively few longitudinal research undertakings in gerontology, appreciation is expressed to the participants for their support and to the Field Services Branch for interviewing. Together they provide an effective team, providing us with the facts on which we can base a profile of age-related changes in family life, work-life, leisure preferences and health patterns of a normal population sample.

Work is progressing on a Bibliography of Canadian Research Publications in the field of aging — in conjunction with development of the J. W. Crane Memorial Library of Gerontology and Geriatrics. This was a direct outgrowth of the Ontario Conference on University Education Related to Aging, and The Teaching of Profes-

OFFICE ON AGING

sional Skills in the Field of Gerontology, (Osler Hall, Academy of Medicine, Toronto, March 26, 1965), co-sponsored by this Department, the then Select Committee, the Ontario Department of University Affairs, the Ontario Geriatrics Research Society, and the Ontario Welfare Council — Section on Aging.

The Branch also provided lecturers, counselling services and information for various groups ranging from the University and Community College levels to interested volunteer associations, such as the Red Cross, Nursing Schools, Church Groups, etc., to further the setting up of courses, workshops or surveys pertaining to aging and its problems. It has also assisted in inaugurating or promoting preparation for retirement courses.

In addition to consultant services and teaching for a number of agencies and institutions, the Office on Aging has developed sampling techniques for the annual survey of the General Welfare Assistance case-load.

ELDERLY PERSONS CENTRES

For a number of years local communities have had a variety of clubs and drop-in centres for the aged in Ontario. Most of these were established by religious, fraternal, ethnic and voluntary agencies in Ottawa, London, Toronto, and Windsor — to cite a few.

Following THE ELDERLY PERSONS SOCIAL AND RECREATIONAL CENTRES ACT, 1961-62, grants-in-aid for capital purposes have been made available to some of these original centres as they expanded and to other newer facilities. The location of these is shown in Table 4.

During the 1966 Session THE ELDERLY PERSONS ACT was passed and grants-in-aid for administration costs and specialized services were made available to an expanding number of centres and organizations. Baycrest Day Care Centre, Toronto, is one of the largest of these.

All possible assistance is being given to local communities in the planning, design and community survey stages of their work on proposed centres. Appreciation is expressed by Dr. E. Dutton, Special Adviser on Programs for Older People, Community Programs Division, Ontario Department of Education, and Mrs. J. J. McHale, Jr., Director of the London Centre, for their assistance in these matters.

OTHER ORGANIZATIONS

The Office on Aging works closely with a number of other groups whose endeavours merit recognition. At the end of 1966 the Section on Aging of the Ontario Welfare Council officially took over from the former Ontario Society on Aging and has experienced considerable growth.

Dr. W. W. Priddle, Chairman of the Minister's Advisory Committee on Geriatrics Studies and his colleagues, as well as the laymen serving on the Board of Governors, Ontario Geriatrics Research Society, have added the clinical dimension to the over-all field of Gerontology. The rapidly expanding United Senior Citizens of Ontario Incorporated, and similar independent clubs across the Province; the Services for Seniors Committee, Ontario Division, Canadian Red Cross Society; and the National Committee pro tem on Aging, Canadian Welfare Council — all deserve mention. Without their support and that of many other individuals the work of the Branch could not have gone forward.

VOCATIONAL REHABILITATION SERVICES BRANCH

The year 1967-68 has seen acceleration in the rate of growth of the program of the Branch. During the year, 2,968 handicapped persons were referred for service, while a total of 6,596 persons received assistance, as compared with 5,743 the previous year.

The basic purpose of the Branch is to restore and develop the working capacity of handicapped persons, and to prepare and place them in safe and satisfying employment. To achieve this goal, the Branch provides seven basic services; assessment, medical restoration, counselling, vocational training, travel and maintenance allowances, occupational tools and equipment, and placement in employment.

(1) **Assessment:** Medical, social and vocational assessment to determine the nature of the disabled person's handicap, and to develop plans to overcome the handicap, is the foundation of all rehabilitation services. Assessment is undertaken with the patient's attending physician, as well as psychologists, teachers, and employers. In addition, special assessment facilities offered by rehabilitation workshops and medical rehabilitation centres are used extensively.

(2) **Medical Restoration:** Since the restoration of the disabled person to the maximum level of employability is the ultimate goal of rehabilitation, provision of medical and related services, such as artificial appliances, is particularly important. Despite the fact that the majority of the disabled persons seen by the Branch have already received some type of medical attention prior to referral, the demand for restoration services further increased during this fiscal year. The number of persons assisted increased from 666 to 728 (9%), the number of services provided, from 914 to 1,005, (10%), while expenditure rose from \$122,000.00 to \$148,575.00, (22%).

The greater increase of expenditures as opposed to the number of services provided may be a reflection of increase in professional fees, of the higher cost of appliances, and of increased demand for more sophisticated appliances. Expenditure for artificial limbs alone is higher than the total cost of the following four highest services combined, i.e. wheelchairs, dental care, braces and corsets and shoes. Of all prosthetic appliances, 92% were manufactured by private prosthetists, and 8% by the Prosthetic Services of the National Department of Health and Welfare Prosthetic Services in Toronto and London.

(3) **Counselling:** The key to the rehabilitation program is the counselling and guidance provided through all phases of rehabilitation, to help the disabled person select and achieve the right job objective. An additional twenty counsellors and supporting clerical staff were recruited to strengthen this aspect of our work.

(4) **Vocational Training:** The high rate of expansion is most clearly illustrated in the growth of services to disabled persons who received training as

VOCATIONAL REHABILITATION SERVICES

part of the rehabilitation program. While in 1965-66 the number of training cases increased by only 4% over that of 1964-65, the rate of growth reached 25% by the end of 1966-67, and 40% by the end of 1967-68.

While clerical, semi-skilled and skilled trades remain leading occupations for which training was provided, it is interesting to note that fully one-third of all handicapped persons undertook work adjustment training programs. This reflects the more severe degree of handicap being referred to the Branch, and the increasing opportunities being provided through the development of occupational training by workshops for persons suffering from mental illness and mental retardation.

(5) Maintenance and Transportation: Another essential service is the provision of maintenance and transportation allowances during training and restoration. Approximately, 57% of all trainees received maintenance allowances, involving a total expenditure of \$911,783.00.

(6) Occupational Tools: Equipment and tools which are necessary to enable trainees to obtain a particular job are provided. Barbering, watch-making, and electrical equipment repair continue to be the chief occupations where such help is required. In addition, handicapped persons were established in saw filing and sleigh manufacturing businesses.

(7) Placement: The provision of employment is the final goal of vocational rehabilitation. During the year, 436 disabled persons were placed directly in employment, while 735 were successfully employed following the provision of training, medical treatment, and artificial appliances. Thus, for the first time in the history of the program, well over 1,000 persons were re-established into gainful employment.

(8) Continuous Employment in Sheltered Workshops: Experience in the past number of years has repeatedly demonstrated that for the more severely physically and emotionally disabled, specialized facilities, such as sheltered workshops, have become a necessary and indispensable tool of the rehabilitation process. The sheltered workshop which simulates a real work setting is being used, not only for assessment purposes, and for the determination of vocational potential, but also increasingly more often for long-term employment for the more seriously handicapped.

The year 1967-68 has marked a new and vastly important phase for the Branch. For the first time, as a result of the passing of THE VOCATIONAL REHABILITATION SERVICES ACT, 1966 it has been possible to assist the sheltered workshops with the provision of an operating grant in the amount of \$20.00 per person per month, based on an approved number for each sheltered workshop registered and approved by the Branch. Consequently, in 1967-68 there was a total of 87 workshops registered with the Branch, and thereby eligible to receive an operating grant. Of these 87 workshops, 54 are workshops affiliated with The Ontario Association for the Mentally Retarded; 12 with The Rehabilitation Foundation for the Disabled; 9 with The Canadian National Institute for the Blind; 3 with The Canadian Mental Health Association, and 9 of a community and general nature. All of these workshops combined received operating grants for a total of 2,372 persons. The amount expended on operating grants for these individuals was \$569,400.00.

VOCATIONAL REHABILITATION SERVICES

As is becoming clearly evident, many handicapped individuals with whom the Branch is dealing will unlikely ever resume full gainful employment in the competitive labour market. However, some measure of productivity, as well as social and psychological well-being, can be achieved in the sheltered workshop. Therefore, successful rehabilitation for these individuals becomes a realistic possibility so long as these specialized facilities are available. By the giving of operating and capital grants to these organizations, these needed facilities are able, not only to extend their services, but to improve their programs.

In anticipation of the capital grants program, it is expected that the Branch's contribution of a 25% capital grant, given to approved workshops for expansion purposes, will stimulate and promote an improvement in the physical facilities of many sheltered workshops. In addition, the expansion and improvement of the physical facilities will serve to make the important programs in these workshops available to more disabled persons.

INDIAN DEVELOPMENT BRANCH

The Indian Development Branch has been established to assist Indian persons in the process of becoming fully participating members in the life of the province. This Branch has been charged with the responsibility of finding and implementing the means whereby Indian people may achieve the maximum social, economic and cultural development of their communities.

The philosophy and method used by the Indian Development Branch is that which is known universally as "community development". Community development is based essentially and above all on human resources. The primary goal is to mobilize the potentialities inherent in the people with whom we work, to develop people who are independent, responsible human beings involved in decisions affecting their lives.

The Indian people of Ontario face problems which arise from a situation which is complicated by historical, social and cultural factors. There is no simple solution. It calls for close co-operation on the part of many people.

To this end the Indian Development Branch works closely with such organizations as the Union of Ontario Indians and the Indian-Eskimo Association. Also, the Branch forms a secretariat for such groups as the Indian Advisory Committee to the Minister of Social and Family Services, and chairs two governmental co-ordinating committees on Indian affairs, a provincial inter-departmental committee and a federal-provincial committee.

During the past year as a part of its resource development function the Indian Development Branch assisted a number of Indian Friendship Centres by providing financial support and program counselling. The centres receiving grants are located in Toronto, Parry Sound, Port Arthur and London. It is anticipated that assistance to Friendship Centres will expand in the years ahead. Increased demand is being made for their services as more Indian people migrate to urban centres.

Under a 1966 Federal-Provincial cost-sharing agreement with the Federal Government, Ontario established a Community Development Projects Fund. The Fund was used to provide financial support for projects related to developments in Indian communities, such as:

- 1) a grant to the Ontario Economic Council to conduct a study of Indian employment in the Sioux Narrows area.
- 2) a grant to the Amik Association to cover the salary and expenses of a Business Manager who would assist in the development of economic projects and the determination of market resources for the Whitefish Bay and Sabaskong Indian Reserves.
- 3) a grant to the Moosonee Day Nursery to defray the cost of construction of a day nursery for Indian children at Moosonee.

The Indian Development Branch is directly involved in various parts of Ontario

INDIAN DEVELOPMENT

through its Community Development Workers. The community development worker acts as a catalyst with any group of people in Indian communities to:

- 1) animate it to become more aware and more clearly conscious of its freedom, its potential and its responsibilities;
- 2) help it learn to identify its situation and problems by itself;
- 3) have it look for the solution of problem situations by using objective and rational methods;
- 4) assist it to make the decisions required by a given situation, exploit its resources and services at its disposal and to organize itself for action.

The community development person works with the community as a collective body, enabling it to function as a group in making decisions and taking action. He provides the community with a wide range of information and assures that the community or interested group understands planning which comes from the outside, realizes that it is free to criticize, to accept or reject what is proposed and that it can suggest changes which may seem desirable.

During the course of the past year, Community Development Workers were located at Parry Sound, Moosonee, Sioux Narrows, Red Lake, Kenora, Dryden and Sault Ste. Marie. They worked with Indian communities both on-reserves and in unorganized territory.

SOLDIERS' AID COMMISSION AND THE ONTARIO CANTEEN FUND

As a matter of economy the funds of the Soldiers' Aid Commission and the Ontario Canteen Fund are operated as a single agency to relieve the distress of veterans of the First World War and their dependents.

It is the opinion of the administrators of the funds that the monies that are available should only be used when no other source of assistance is available to the applicant. The monies administered by the Soldiers' Aid Commission are bequests left as one benefactor stated in her will "to be used for the assistance of war widows in need." The fund administered by the Ontario Canteen Fund is money accumulated as profits of the Canadian Expeditionary Forces Canteens of World War I. This money is administered by trustees for the Ontario veterans of the first war. These are not public funds and the administrators consider that it is their task to relieve distress be it actual or mental strain caused by a mounting debt. For the reasons stated it is sometimes considered justifiable to accept accounts that are not legally collectable to relieve the mind of an aging veteran or a veteran's widow. It is in this field that our small staff renders its most valuable service.

In summary, 680 veterans or dependents of veterans were given financial assistance that could not have been received from any other source.

The advanced age of the veteran of the First World War makes it impossible for him to climb ladders and maintain his house in good repair as he did in his younger days. House repairs accounted for 34 per cent of assistance granted.

It is worthy of note that the funds at the disposal of the trustees of the Ontario Canteen Fund are nearing depletion, it should also be noted that by careful investment and good administration the Canteen Fund has rendered assistance for almost fifty years.

Since the present administration combined the Soldiers' Aid Commission and the Canteen Fund in 1949, assistance in the amount of \$1,109,007.77 has been granted to veterans and dependents.

PERSONNEL BRANCH

On April 1, 1967, the complement for the Department was increased from 920 to 1,199 employees. In the early part of 1968 the complement received a further increase of 59 to provide additional staff for legal aid and special home care programmes and management support services. Therefore, in the latter part of the 1967/68 fiscal year the total complement for the Department was 1,258.

STAFFING

1. Hires

The staffing function and its related services were kept under considerable pressure in view of the 37% staff increase. A total of 317 people were hired during this fiscal year, representing an average of 31 people per month. Of this total, 180 were additional and 137 were replacements. Included in these figures is the addition of 46 field workers and 20 legal aid field staff for a total of 66 additional field workers. Our staffing in the 1967/68 fiscal year increased by almost 50%. The Personnel Branch almost doubled its own size by hiring 5 additional staff.

Comparison Table of Staffing 1966/67 and 1967/68

Year End	Complement	Additional	Replacement	Total	Field Staff
March 31, 1967	920	127	85	212	32
March 31, 1968	1,258	180	137	317	66

2. Terminations

As indicated by the number of staff replacements we had 137 terminations. The Department's turnover increased to 12% from 9.9%, still remaining below the Government average. We are sorry to report that 9 employees died while on staff, as compared with 2 in the previous fiscal year.

3. Promotions

A total of 186 promotions were processed for personnel of the Department with a variety of classifications involved. This represents an increase of 36 over the previous year.

PAY AND CLASSIFICATION

The growth of the Department resulted in the combined requirement of reviewing job descriptions, writing new jobs and recommending new classifications.

A major undertaking involved the reorganization of the Family Benefits Branch with the creation of new job descriptions representing the total complement of 295 employees. This major revision is now nearing completion. Aside from this assignment, every Branch received the attention of our Classification personnel. While most new jobs were assigned to classes previously allocated to our Department, the

PERSONNEL

following additional classes were also assigned to us: Nutritionist; Training Officer 1, Social Work; Training Officer 2, Social Work; Training Officer 3, Social Work; Executive Director, Finance and Administration Division; Departmental Accountant 3; Legal Officer 3; Systems and Procedures Officer 1; Public Relations Officer 2, and Personnel Officer 3 (b). In addition to this, 7 significant staff support positions were created and allocated to existing job classifications.

The Classification section now maintains 109 separate job classifications for the positions in the Department.

All of these Classifications will receive salary revisions effective during this fiscal year. The Personnel Branch has been actively involved in preparing recommendations and sitting in on salary negotiations between the Treasury Board Staff Relations Branch and the Civil Service Association officers.

Social Workers and Welfare Workers received salary increases effective April 1 and November 1, 1967, ranging from 9 to 15 per cent. Professional classes received increases effective from October 1, 1967, ranging from 4 to 9.5 per cent. A second stage of this award will be implemented on October 1, 1968. The clerical staff will receive a revision effective from January 1, 1968.

The 1967/68 fiscal year was very active and we look forward to another favourable year.

TRAINING AND STAFF DEVELOPMENT BRANCH

This was the first complete year of operation of Training and Staff Development as a separate Branch. Staff training has three primary responsibilities—

- (i) ensuring that the educational system is producing the manpower necessary to fulfil the requirements of the department for staff;
- (ii) ensuring that staff are equipped to undertake the responsibilities and tasks assigned to them in the most effective manner; and
- (iii) participating in departmental planning to ensure that as changes are made in programs staff are prepared to carry out the changes.

I. Working With Educational Institutions:

The policy of the Department is *not* to undertake educational activities that can be better performed by an educational institution, and at the same time, undertake such training activities as are a legitimate function and role of the Department. To achieve this, the staff training branch represents the Department in partnership with educational institutions—

- (a) in planning appropriate courses that will prepare staff for careers in social work and social services,
- (b) working with educational institutions to modify existing programs to better meet the needs of the service agencies, and
- (c) working with educational institutions to see what can be done to upgrade the performance of social agencies.

Methods employed in achieving this are:

- (i) relating to the universities through field instruction placements. Field instruction is a vital link in the relationship that exists between the educational institution and the service agency. This provides the students in the educational institution with a laboratory experience where they can apply their knowledge in a practical situation. Not only will this assist in better understanding of agency function on the part of the student, but will also ensure that the schools are aware of the needs of the field. Indirectly this has also served as a useful recruiting device, as well as keeping agencies aware of current educational thinking. This partnership is achieved by joint appointments of field instructors with recognized universities that offer social services courses and providing field instruction opportunities for educational institutions that provide social service training, such as Ryerson and the Community Colleges. Two full-time staff have been appointed as field instructors.
- (ii) *Bursary Programs*—The Department believes this is one way to meet our future manpower needs by attracting people to enter this field with a particular commitment to the public sector. Eighty-five bursaries are offered in this area.

TRAINING AND STAFF DEVELOPMENT

- (iii) One method of ensuring that services are met is through a system of educational leave, either full or part-time.
- (iv) One other way of working with the educational institution is in the broader educational planning. A good example of this is the Continuing Conference on Education and Training for the Social Services in Ontario. Another method of involving the educational systems is through the Minister's Advisory Council on Public Welfare Training. In addition to these two areas, the Training and Staff Development Branch is active with the Staff Training Committee of the Ontario Association of Children's Aid Societies and the Staff Training Committee of the Ontario Welfare Officers' Association.

II. Internal Staff Training Activities:

Internal staff training activities are developed to ensure that each employee is performing to the best of his ability, regardless of his previous educational background. This is achieved through three primary activities which can be defined as:

- (a) Orientation,
 - (b) In-service Training,
 - (c) Staff development.
- (a) In the staff training program the orientation phase is important and has as its objective developing an awareness of the total services provided by the Department. Each employee needs to know how his job and responsibility relates to the total services. Another objective of the orientation program is to develop a beginning appreciation of what it means to be a civil servant.
 - (b) In-service Training—on a short-term basis where the educational institutions have not been able to develop appropriate courses, it is necessary to provide for specific training. Here the branch has developed appropriate courses to meet the needs of the various branches.
 - (c) Staff development activities are a legitimate function of a social service agency, and are designed as a continuum program of upgrading and updating competence of existing employees. This was done either through agency-sponsored institutions, workshops and conferences, or sending appropriate staff to institutions, workshops and seminars conducted by the larger social service system or by educational institutions on a continuing education basis.

III. Meeting Manpower Requirements:

One method of discharging this responsibility is ensuring that along with policy program and budgeting planning, there is training planning going on at the same time to ensure that the staff in the future will be able to carry out the objectives of projected programs. This is done through working with the program branches in reviewing their existing training activity, identifying staff with potential for future training, and ensuring that such employees have the opportunity to take advantage of existing programs. One of the more successful ways is the development of an appropriate policy and procedure manual. This has been done in the Family Benefits area, and the Municipal Welfare Services area.

ONTARIO

**REPORT
OF THE
MINISTER
OF
SOCIAL AND FAMILY SERVICES**

**1968/69
FOR THE FISCAL YEAR**

ONTARIO
DEPARTMENT OF SOCIAL AND FAMILY SERVICES
OFFICE OF THE MINISTER

His Honour,
The Lieutenant-Governor of the
Province of Ontario.

May It Please Your Honour:

The undersigned has the honour to transmit herewith the
Thirty-Eighth Annual Report of the Department of Social and Family
Services, for the Fiscal Year 1968-69.

I have the honour to be, Sir,
Your obedient servant,

A handwritten signature in dark ink, reading "John Yaremko".

John Yaremko, Q.C.,
Minister of Social and Family Services.

**The Department of Social and Family Services Administers
the following Statutes:**

The Blind Persons' Allowances Act

The Charitable Institutions Act, 1962-63

The Child Welfare Act, 1965

The Children's Boarding Homes Act

The Children's Institutions Act, 1962-63

The Day Nurseries Act, 1966

The Department of Social and Family Services Act, 1967

The Disabled Persons' Allowances Act

The District Welfare Administration Boards Act, 1962-63

The Elderly Persons Centres Act, 1966

The Family Benefits Act, 1966 (in force April 1, 1967)

The General Welfare Assistance Act

The Homemakers and Nurses Services Act

The Homes for Retarded Persons Act, 1966

The Homes for the Aged and Rest Homes Act

The Indian Welfare Services Act

The Mothers' Allowances Act

The Old Age Assistance Act

The Soldiers' Aid Commission Act

The Vocational Rehabilitation Services Act, 1966

*The Honourable John Yaremko, Q.C.,
Minister of Social and Family Services*

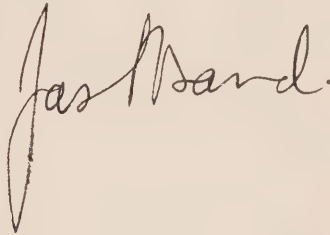

REPORT OF THE DEPUTY MINISTER

Memorandum to:

The Honourable John Yaremko, Q.C.,
Minister of Social and Family Services.

I have the honour to submit herewith the 38th Annual
Report of the Department of Social and Family Services.

This Report covers the Fiscal Year ending March 31st,
1969, and is respectfully submitted.

A handwritten signature in dark ink, reading "James S. Band". The signature is written in a cursive style with a large, stylized initial "J" and "B".

James S. Band,
Deputy Minister.

CHILD WELFARE BRANCH

WORKLOAD TRENDS

Reviewing the workload of the Children's Aid Societies for the calendar year 1968 shows the continuation of trends that were apparent from early 1966. Requests for guidance, counselling and other services from married parents declined by 5 per cent from such new requests in 1967. New unmarried mothers requesting service increased by 3 per cent, contrasting with the 9 per cent increase noted in 1967. As a result, the numbers of children admitted to the care of the Societies in 1968 totalled 11,641, an increase of some 213 children or 1.8 per cent only over 1967 admissions. This represents the smallest increase in admissions to care since 1960.

Adoption placements continue to grow at a most satisfactory rate, with new records again being achieved in 1968. A total of 5,445 children were placed by the Societies in 1968, representing an increase of 12 per cent over the previous record of 1967 and some 105 per cent more than the number placed in 1958. It is also significant to note that the numbers of privately-placed children on adoption dropped to a new low in 1968, totalling 658, and that numbers of children adopted by relatives declined from the peak year of 1967. In total, the private adoptions amount to 8.3 per cent of the total number of placements, a figure far lower than that for any comparable jurisdiction, and a clear indication of the public confidence in the adoption programs of the Province.

In the institutions for children and young people under the jurisdiction of this Branch, the year was a notable one. The progress of the Accreditation program of the Mental Health Division of the Department of Health resulted in the transfer of further institutions to that jurisdiction. This, while it made no change in the total beds available, had the effect, statistically, of reducing the number of children served under the Children's Institutions Act by 13 per cent. Continued growth in all other institutional fields is illustrated by a 9 per cent increase in residents of homes for unmarried mothers and by a 25 per cent increase in residents of institutions for troubled youth, both under different sections of the Charitable Institutions Act. A parallel growth in residences for the retarded is shown by the 19 per cent increase in days of care provided under the Homes for Retarded Persons Act. In total, some 8 special homes and institutions for children and young people with widely varying problems were opened in 1968 providing 113 additional beds under the jurisdiction of this Branch.

ADMINISTRATIVE TRENDS

As the resources expand for dependent children and those with special needs, so also do the expenditures of public funds to set them up and maintain them. In 1968, under the Child Welfare Act, the provincial share of total services provided totalled \$29,598,286.23, an increase of 21.6 per cent over the year before. The total expenditures for all types of institutions, including the capital grant of \$5,000 or \$1,200 per bed and 80 per cent of maintenance costs for all non-ward residents, amounted to \$1,985,238.11, an increase of 12.1 per cent.

A further merger of two neighbouring Societies occurred in 1968, with the creation of the Children's Aid Society of the Niagara Region. The number of Children's Aid Societies now stands at 51.

Within the Branch structure a new level of staff called Field Workers was introduced to assist our professional staff to evaluate the service of the Children's Aid Societies. A study was begun to develop and implement criteria for better measuring the effectiveness of the services of the Societies.

Altogether, 1968 was a busy and productive year for the Child Welfare Branch and the many Boards of Directors and Society and institutional staffs with whom we work for the improvement and expansion of the services for children in this Province.

DAY NURSERIES BRANCH

EFFECT OF DAY NURSERIES ACT, 1966

During this period the result of the operation of the Day Nurseries Act has become clear. There has been a very substantial increase in the number of nurseries in receipt of public funds, either in the form of municipally operated nurseries or through agreements arranged between municipalities and private nurseries. The total number of nurseries receiving provincial subsidy was 100 on December 31, 1968. There was also a net gain of 59 nurseries at the end of the year, whereas in the period 1949 to 1965 the average net gain was 12 nurseries.

PROGRESS OF THE INTER-DEPARTMENTAL COMMITTEE RECOMMENDATIONS

The Inter-Departmental Committee on Day Care convened by the Department of Labour made its final recommendations in December, 1966. It is interesting to note how many of these have since been implemented. The staff of the Day Nurseries Branch has been greatly increased, and prompt service is available for all municipalities, groups and individuals planning to organize nurseries.

Further recommendations concerned the setting up of nurseries for specialized purposes, i.e. in industry, for short terms in seasonal industries, and in connection with Manpower training centres. These possibilities have all been explored, and the conclusion has been that it is preferable to establish community nursery services which may be utilized for these special purposes rather than attaching the nursery to a specific industry or training centre.

Another recommendation was that bursaries should be made available for persons training to work in nursery and day care centres. These are now included in the funds allotted to the Training and Staff Development Branch of the Department.

A further recommendation of the committee concerned the provision of capital grants for the construction of nurseries. As the Canada Assistance Plan does not permit recovery of such expenditures, no change has been effected in the Ontario legislation in this respect. Judging by the steady increase in public and private nurseries, it would appear that the lack of capital grants is seriously retarding the provision of service at the present time. The increasing trend to utilize downtown churches would seem to be a wise use of space which is otherwise idle through the week. In addition, many public housing developments are providing facilities which can be rented by the municipality for the establishment of nurseries.

The two final recommendations of the 1966 Inter-departmental Committee concerned the need for more extensive provision of day care for young school age children. The need for school lunch facilities was stressed, with non-teacher supervision of the lunch hour. It was also felt that after school programs for children of working mothers were greatly needed.

The Inter-departmental Committee was reconstituted in 1968 under this Department. It has concerned itself mainly to date with the problems of the young school child whose mother is employed. The extent of the problem can be understood from the committee's finding that 55,000 such children in elementary schools are eating their lunch at school.

HALF DAY AND ALL DAY NURSERY PROGRAMS

It has always been apparent that the nurseries serve two basically different functions, but often in the same setting. The care and education of the children is the core of every nursery program, but the needs of the employed mother are also well served by about one-third of all nurseries. Many nurseries provide a full day program for children whose mothers work, as well half day programs for children whose mothers are at home. It has also been apparent that some employed mothers send their children to half day nurseries and make other arrangements for the child's care for the rest of the day. A survey of this practice was carried out by the Branch in 1968 and revealed over six hundred of such placements in nurseries throughout the province. The two largest groups of mothers using this plan were nurses and teachers.

NURSERIES FOR HANDICAPPED CHILDREN

Nurseries for children with various handicaps have always been an important feature of the work of the Branch. We are pleased, however, to see that the nurseries for the deaf have all been transferred to boards of education, and the nurseries for the emotionally disturbed are now qualifying under the Children's Mental Health Act. Thus the parents of these handicapped children are relieved of the cost of the special education and treatment that they require.

Children with other types of handicaps—blindness, crippling conditions and mental retardation—are still being cared for in ordinary nurseries or in those especially arranged to meet their special needs. These nurseries are licensed and supervised by this Branch.

HEARINGS UNDER THE DAY NURSERIES ACT 1966

A feature of the new Act was the provision for hearings for persons whose licence had been refused or revoked. Only one such hearing has been held. The application for a hearing was fully reviewed and was refused. The applicant did not exercise the right to appeal to the Review Board.

IMPROVEMENT OF STANDARDS OF CARE

Under the new Act there has been a general increase in the standard of care and training in the nurseries. The use of conditional licences for specific periods of time has been very effective in improving standards. The co-operation of municipal officials concerned with local fire, health and zoning regulations has been invaluable in up-grading these nurseries, as well as in the general supervision of all nurseries.

There has also been advances in the premises used for nurseries. In addition to the services of the departmental consultant architect, the Branch employed a student architect during the summer of 1968. "A Design Guide for Planning Nursery Centres for Young Children" was produced and has been widely circulated for the use of architects and builders. It is having a good effect on the proper renovation of buildings to make them suitable as nurseries. New buildings constructed as nurseries are required to have their plans approved by the Branch, and this guide has been useful to the planners of these buildings.

FAMILY BENEFITS BRANCH

The Family Benefits Branch is responsible for determining the eligibility of persons who apply for assistance under The Family Benefits Act. Those who receive allowances and other benefits are persons who are in need by reason of age, disability, permanent unemployability or loss of the principal family provider.

The budget of the Family Services Branch for the fiscal year ending March 31, 1969, was \$110,772,000. By March, 59,032 individuals and family heads were receiving allowances with the average monthly payment being \$130.97.

CASELOAD TRENDS

Of the Family Benefits caseload, 29,474 were single persons and 29,558 were living in family situations. There was a reduction in the number of elderly single recipients from 12,218 a year ago to 10,161, resulting from the lowering of the qualifying age for Old Age Security. The disabled and blind accounted for 19,313 of the single caseloads.

With regard to the family situations, 20,428 represented mothers with children and 4,918 were two-parent families where the father is unemployable for medical reasons. Allowances were being paid to 1,401 foster mothers at the end of the fiscal year. Foster mothers were usually the grandmothers or aunts of orphaned children.

DETERMINING ELIGIBILITY

The legislation defines a person in need as one who has liquid assets of not more than \$1,000 plus \$200 for each dependant. If the spouse is over 60 years of age an additional \$300 is allowed. The amount of assistance which may be provided varies with the size of the family and the ages of the children. The budget is determined on the basis of requirements for food, clothing, utilities, household supplies and personal items. In addition consideration is given to shelter and fuel costs and the need for special diets.

The applicant's income is compared with his budgetary requirements. Two important amendments dealing with income calculations were made to The Family Benefits Act during the year:

- (1) the amount of income derived from roomers or boarders who are recipients under The Family Benefits Act or The General Welfare Assistance Act is exempt; and

- (2) the income available and paid as a cost of living increase to Old Age Security recipients is no longer taken into account. In addition, there are exemptions on certain portions of earnings from wages and salaries and these exemptions vary with the size of the family.

Premium free hospital and medical insurance is available to most recipients and dental services are provided to most families with children.

Hospital and medical benefits are provided to needy Old Age Security recipients. Single pensioners with an annual income of \$1,700 or less and married pensioners with an annual income of \$3,000 or less qualify for benefits free of charge. If the applicant's income is greater than these amounts, it is compared with his expenses. The liquid asset limitation previously mentioned applies to this group. At March 31st, 1969, 76,120 pensioners were receiving free health benefits.

The Branch also reviews the continuing eligibility of those who are paid allowances under The Old Age Assistance Act, The Blind Person's Allowances Act, The Disabled Persons' Allowances Act and the Programmes of Assistance to Widows and Unmarried Women and Assistance to Dependent Fathers. At March 31st, 1969, there were 3,351 persons receiving these allowances.

The acceptance of certain applications depends on medical evidence as well as need. The Branch has a Medical Advisory Board which consists of a Chairman and two members, all of whom are qualified physicians. It is the Board's function to express a medical opinion on the eligibility of applicants who are disabled, blind or unemployable.

BRANCH PERSONNEL

The Branch is organized under a Director and an Assistant Director with a staff of approximately 300 persons. There are several operating units within the Branch dealing with specific types of cases.

Because of the increase in the number of family type cases during the past year, and the close liaison with the Canada Pension Plan, the caseload of widows with children was established as a unit.

Since the establishment of the Board of Review to hear appeals on Family Benefits and other assistance cases, a special unit in the Branch has been given the responsibility of reviewing Family Benefits cases referred to the Board and presenting the Director's position at Board hearings.

FAMILY SERVICES BRANCH

This year has marked the initial establishment of the Family Services Branch, a Branch designed to operate a new and vigorous social service program to assist recipients of departmental allowances in achieving economic independence and more effective functioning in society.

Initially, caseloads of the Branch have been made up primarily of those recipients of Family Benefit Allowances who are experiencing serious mental, emotional, marital, child-rearing, budgetary, social adjustment, or physical health problems and are referred by the Field Worker to the Family Services Branch. Through the medium of counselling, group treatment and co-operative work with related Agencies, trained counsellors have endeavoured to help such clients achieve a more effective adjustment to society and economic independence. In addition to such direct services, one of the primary roles of the Branch is to consult with Municipal Welfare Departments concerning the establishment of counselling services for their clientele.

The Family Services Branch operates in recognition that financial assistance programs are not necessarily the total answer to a family's problems. The Branch provides assistance in such areas as:

- (a) Housing—making contacts with Ontario Housing, helping to locate housing.
- (b) Health—working with Public Health Nurses, arranging General Welfare Assistance for special medical needs such as eye glasses or dentures
- (c) Finances—planning budgets, providing sound buying advice
- (d) Employment—making people aware of retraining facilities, job opportunities
- (e) Community Resources—contacting Agencies, such as church groups, service clubs and other community resources of which the family may be unaware.

During this first year of operation, a pilot Unit consisting of one supervisor and five counsellors has been established in the Toronto Regional Office. Individual counsellors have been located in Ottawa and Brampton, and plan made to open Units in London, Hamilton, Windsor, and St. Catharines. In eight months of operation the Toronto Unit served 170 families, while two out-of-town counsellors served approximately 70 families.

While the year has been an exploratory one in terms of recruiting new staff, developing a variety of methods of service, establishing working relationships, both within the Department and in the Community, it has also been one of encouraging accomplishment and enhancement of the welfare of many persons.

FIELD SERVICES BRANCH

A number of trends and developments are indicative of the changing nature of the total field operations of the Department carried out by the Field Services Branch with Regional Offices throughout Ontario. Among the more significant were:

- (a) the formation of the Legal Aid Assessment Branch to administer those aspects of the Ontario Legal Aid Plan which by legislation are assigned to this Department.
- (b) the assumption of responsibility through the six Northern Regional Offices for the administration of General Assistance and other social services for Indians living off reserves in most areas of the north. These were formerly administered by the federal government.
- (c) the attachment of additional personnel from other Branches to Regional Offices and sub-offices.
- (d) the expansion of practical counselling and guidance services to assist those persons receiving provincial assistance who are experiencing other problems and difficulties.

Most notable of all perhaps was the continuing high interest of the public in the Family Benefits program throughout its second year of operation. Thousands of enquiries and requests for applications were received in the Regional Offices and sub-offices and 22,125 new applications were completed by the field staff during the course of the year.

FAMILY BENEFITS

As of March 31st, 1969, Family Benefits accounted for 95.8 per cent of the Field Services caseload compared to 90.6 per cent in the previous year. Residual Welfare Allowances cases decreased from 6,595 to 2,965 or 4.2 per cent of the total. A comparison of caseloads for the 1968 and 1969 years show the following:—

	Numbers		Percent of Total	
	March 31st 1969	March 31st 1968	March 31st 1969	March 31st 1968
Family Benefits				
Dependent Children	28,905	24,722	41.7	35.4
Single Persons	32,581	33,631	47.0	48.2
Married Persons	4,930	4,887	7.1	7.0
Sub-Total	66,416	63,240	95.8	90.6
Residual Allowances	2,965	6,595	4.2	9.4
Total	69,381	69,835	100.0	100.0

Reference was made in last year's report to the rapid increase in the number of families with dependent children both in absolute numbers and as a percentage of the whole. This trend continues with the 28,905 dependent children cases accounting for 41.7 of the total compared to 35.4 per cent last year. Generally speaking, family cases with dependent children require a greater investment of time by field staff because of the larger number of persons per case and because of the complexity and diversity of problems that are inevitably encountered when dealing with children of school age and pre-school age. In the past three years, the dependent children caseload has almost doubled from 14,817 in 1965-1966 to 28,905 in 1968-1969.

Of note also, is the fact that the total caseload decreased during 1968-69 by 454 cases while the entire Family Benefits caseload was increased by 3,176 cases and the number of dependent children cases by 4,183. These figures reflect a dramatic shift in the composition of Field Workers' workloads and the nature of the cases they serve.

NORTHERN SERVICES

The transfer of responsibility from the federal to the provincial level of government for welfare services to Indians living off reserves in unorganized areas has added an important new aspect to the work of the six northern Regional Offices. To meet the special problems of the Indians, new staff designated as Indian Services Workers have been appointed. Their duties include finding prospective employers for Indians; encouraging and helping Indians to find and accept employment; assisting Indian families to find suitable living accommodation and promoting their interest in upgrading the standard of housing in Indian Communities, utilizing indigenous labour with supervision and direction from qualified tradesmen; and ensuring that public assistance is granted to those who are eligible. They work closely and co-operatively with personnel of the Indian Development Branch.

The General Welfare Assistance caseload of the unorganized areas varies considerably from month to month and from season to season. With the addition of Indians it is averaging 1,200 cases a month.

LEGAL AID ASSESSMENT

A detailed account of Legal Aid Assessment will be found in the report of that Branch elsewhere in the Annual Report. In areas where the volume of Legal Aid Assessment work does not warrant full-time Legal Aid Assessment Branch staff, investigations and assessments are carried out by Field Services personnel. This co-operative effort by the two Branches appears to be an effective method of maintaining this essential service at minimal cost.

SPECIAL INVESTIGATIONS UNIT

The chief function of this unit of the Field Services Branch is to locate deserting husbands and putative fathers where dependents apply for and receive financial assistance in the form of Family Benefits or General Assistance.

The Unit conducted 4,748 investigations during 1968-1969 and was successful in locating 1,887 absent fathers or 39.7 per cent. These figures compare to 1,809 successful investigations, representing 41 per cent located the previous year.

PERSONAL SERVICES

In keeping with the growing emphasis of the Department on preventive and restorative services, caseloads carried by individual Field Workers were further reduced to enable them to offer greater help to persons and families with needs and problems of many kinds in addition to the need for financial assistance.

A comparison of average caseloads over the past five years indicates the number of cases per Worker has been reduced more than 25 per cent in that period.

Average Monthly Caseloads Per Field Worker

Year	Number of Cases	Percentage Decrease
1964-65	421	—
1965-66	417	1.0
1966-67	372	10.8
1967-68	333	10.5
1968-69	314	5.7

Improvement in the quality of service offered to the public is also being attained through the upgrading of staff. Twelve Field Services staff were granted full-time educational leave in 1968-1969; ten attending the Social Services Course at The Ryerson Institute of Technology and two at Schools of Social Work. An additional 35 to 40 were assisted financially to take extension courses at Universities and similar institutions. With more qualified staff, lower caseloads and the development of complementary services in other Branches, there is no question that our direct services, for people in need of differing kinds of help, are being met more adequately now than at anytime in the past and should continue to improve in future years.

HOMES FOR THE AGED BRANCH

The year 1968 marked the affiliation of the Homes for the Aged Branch and the Office on Aging to more effectively co-ordinate the Department's services for the elderly of Ontario. The Homes for the Aged program was to continue in the field of specialized housing, while the Office on Aging would focus specifically on research, evaluation and dissemination of facts related to aging.

HOMES FOR THE AGED PROGRAM

Improvements In Housing

It has now been 20 years since the amendments and new legislation set out in the Homes for the Aged Act and the Charitable Institutions Act. The active building program and never-ending improvement of existing Homes have led to the fact that at the end of the 1968-69 fiscal year, there were over 150 Homes for the Aged with a total of 21,000 beds to serve the older age population who require such care.

Capital Grants-In-Aid

The Province of Ontario has consistently provided significant grant-in-aid for the construction and improvement of Homes—up to 50% of the cost for land, construction and furnishings in Municipal Homes and \$5,000 a bed for those owned by non-profit private organizations. At the same time grants have been made available to help with operating costs, renovations and replacements to help maintain the high standard of care.

Home Facilities

Throughout the 20-year period the Branch has paid great attention to the improvement of the physical plans of all Homes and the inclusion of such service areas as chapels, auditoriums, beauty and barber shops, craft and activity rooms, adjuvant workshops and equipment, libraries, well landscaped grounds, and such, all designed with the special needs of the elderly in mind.

Parallel improvements have been made in provision of programs in recognition of the individual and group needs of older persons and in the role of Home Auxiliaries, Volunteers, and all community groups, which strive to enrich the elderly person's life.

Continuous Learning

This concern for the accommodation needs of the elderly is being actively and jointly promoted through a number of studies and organizations, such as the studies with members of the architectural professions to find the best way of planning Homes for the elderly. The Provincial Geriatric Study Centre continues to provide leadership for the Home Physicians through annual conferences and the publishing of papers relating to the care requirements of elderly persons in Homes for the Aged.

In co-operation with Education Committee of the Ontario Association of Homes for the Aged, a continuing review is being made of formal training programs and in-service educational opportunities for personnel in the field of Homes for the Aged administration. A programmed learning manual has been produced for the Administrators of Homes for the Aged and Rest Homes and the training program and refresher courses for the Adjuvant group through the Branch, Provincial Geriatric Study Centre, and the Office on Aging are being reviewed.

Trends In Resident Population

A number of trends are discernible in Homes for the Aged for the year 1968-69. Among the elderly residents about 4% are under the age of 60 years, with a higher proportion of men. The predominate age group however consists of men and women 80 to 89 years of age. As one moves up in years in total population, the ratio of females to males increases; the actual proportions are 45.6% men and 54.5% women for everyone aged 60 and over, as of December 1968.

The average age of admission has obviously continued to move up and, indeed, at the point where Old Aged Security Pensions were substantially increased, there was a definite increase in the average age of admission. This year also marked a continuing expansion in provisions for senior citizens' low rental housing accommodation on the part of the Ontario Housing Corporation. With elderly persons having more money, and low-rental accommodation accessible, the criteria for entering a Home for the Aged have shifted from more economic ones to those reflecting the need for personal care and attention. With this shift it is noticed that more and more residents were able to pay in full or in part during 1969 than in previous years (Tables B and F).

OFFICE ON AGING

Long-Term Study On Aging

One of the key developments of 1968 for the Office on Aging was the mid-point of an Ontario 20-year study which commenced in 1959 with 2,000 male volunteers, each about 45 years of age. The Long-Term Study on Aging (LSA) assesses those social, economic and health changes which make up the aging process and those various adjustments men make as they approach retirement age.

The 1968 findings of the study showed that almost two-thirds of the participants had not changed their degree of participation in social activities or their interest in hobbies. Another important finding was that almost all participants rated their own health as good or excellent and that actually just over half of the participants were looking forward to retirement. The Office on Aging intends to study the relationship between occupational classification, income and educational level and attitudes to retirement. This year a study of attitudes towards "aging" as such was undertaken by the Office on Aging and two voluntary agencies but results will not be available until the 1969 review of the study.

Attitudes Survey

The Office on Aging, with interest in the attitudes towards aging, has been developing a test instrument to measure individual and group attitudes towards aging, and this instrument was tested on a variety of groups. An interesting development during the year, in connection with self attitudes of elderly persons, was the presentation of various proposals by the Ottawa Senior Citizens Council to the Canadian Broadcasting Corporation for creating a more effective image of the elderly person.

Elderly Persons Centres

Official openings took place for a number of Centres, including the Baycrest Day Centre adjoining the Baycrest Centre for Geriatric Care in Toronto, the Brant Senior Citizens' Centre in Brantford, the Oshawa Senior Citizens' Centre, and the Burlington Senior Citizens' Centre, the latter being the first Elderly Persons Centre which is structurally and functionally part of the larger Recreation Centre but at the same time is self-contained. The Office on Aging provides consultative services on site selection, design, planning, equipping, and program preparation for these Centres, in addition to capital grants-in-aid to cover 30% of the approved costs of land, construction and furnishings, plus special grants-in-aid for program improvement and enrichment.

Development Regarding Aging

During the year, the Office on Aging was involved with a number of organizations and services for the special needs of the elderly. It supported the Section on Aging of the Ontario Welfare Council in a workshop on Protective Services for Older Persons to show the important role of social gerontology and legislative recognition of the need for services, training programs and inter-disciplinary research in the field of aging.

Through involvement with the Province's Inter-departmental and Advisory Committee on Aging the Office on Aging actively worked for anti-age discrimination legislation in Ontario, and supported an amendment forbidding advertisements restricting applicants for any position on the grounds of age.

During the year the Office on Aging was also instrumental in planning or supporting conferences and special sessions on the needs, problems and resources for the aged, evening courses for persons interested in preparing for their retirement, and related programs operated by industry, unions and other educational groups.

Close co-operation continues between the Office on Aging and the following major agencies and associations: The Inter-departmental Advisory Committee on Aging; the Minister's Advisory Committee on Geriatric Studies; the Ontario Geriatrics Research Society; the Section on Aging, Ontario Welfare Council; Division on Aging, Canadian Welfare Council; Gerontological Society; the American Geriatrics Society; United Senior Citizens of Ontario, Inc.; Services for Seniors Committee, Ontario Division, Canadian Red Cross Society; and the Ontario Association of Homes for the Aged.

SPECIALIZED CARE AND CONGREGATE CARE

MUNICIPAL HOMES FOR THE AGED

DECEMBER 1968

Number and Type of Home	Percentage of Residents in			
	Normal Care	Bed Care	Special Care	Married Quarters
65 Specialized Care Homes	32.2%	48.3%	17.1%	2.4%
3 Semi-Specialized Homes	24.3%	56.0%	19.7%	—
5 Congregate Care Homes	72.4%	4.7%	22.9%	—
73 Homes in all	32.6%	47.8%	17.3%	2.3%

DISTRIBUTION OF RESIDENTS

	Number of Residents	% of Total
65 Specialized Care Homes	11,763	96.1
3 Semi-Specialized Homes	284	2.2
5 Congregate Homes	192	1.6
73 Homes in all	12,239	100.0

Definitions:

Specialized Care—Three-fold division of Home for ambulatory (normal) care, bed or partial bed care, senile (special) care, and married couples suites.

Congregate Care—No special divisions within Home for various types of care. Of the 34 Homes in 1948, 33 offered only congregate care to residents; as of 1968 the reverse is true as shown above. The Branch no longer permits the development of congregate care Homes as these Homes fail to meet the range of socio-medical and emotional needs of elderly residents.

INDIAN COMMUNITY DEVELOPMENT SERVICES BRANCH

The Indian Community Development Services Branch was established to assist the Indian people to find and implement means whereby they might achieve the maximum social, economic and cultural development of their communities.

COMMUNITY DEVELOPMENT SERVICES

To attain its goal the Branch utilizes a method known as Community Development which is, according to the United Nations definition,

"A process of social action in which the people of a community organize themselves for planning and action; define their common and individual needs and solve their problems, execute their plans with a maximum reliance upon community resources; and supplement these resources when necessary with services and materials from governmental and non-governmental agencies outside the community."

The Province of Ontario has a population of 54,000 registered Indians; approximately two-thirds of this number are residents on Reserves. An additional 50,000 persons are of recognizable Indian background. Included in this latter group are communities of Indians located in isolated areas of Northern Ontario.

The Indian Community Development Branch works closely with various Indian Bands and with such organizations as the Union of Ontario Indians, the Indian-Eskimo Association, the Rural Learning Association and the Ontario Institute for Studies in Education among many others. The Branch also serves as a secretariat for the Indian Advisory Committee to the Minister of Social and Family Services and acts in a liaison capacity with other Departments of both the provincial and the federal governments.

During the year community development services, through workers located in various areas of the Province, were provided to many Indian Bands on Reserves as well as to a number of off-reserve Indian communities. One of the most important aspects of this work is the assistance offered to Indians to form Indian Development Corporations. These corporations promote the economic, social and educational development at the local level, thereby increasing local interest and participation in the betterment of the community. During the year workers were located at Dryden, Hearst, Kenora, Moosonee, Parry Sound, Sault Ste. Marie and Sioux Narrows.

COMMUNITY DEVELOPMENT PROJECTS

Another facet of the Branch's operation is aimed at providing financial assistance to Community Development Projects. These projects initiated by the Indian community are evaluated in terms of their contribution to community life and are financially assisted on the basis of the 1966 federal-provincial cost sharing agreement. The assisted community development projects during 1968-69 included Amik Association, Moosonee Day Nursery, Wabigoon Corporation and Widjiitiwin Corporation.

INDIAN FRIENDSHIP CENTRES

The third facet of the Branch's operation is to continue to support and further develop Indian Friendship Centres. The purpose of these centres is to provide a focal point of activity and to serve as a gathering place where Indians can exchange ideas on how best to improve their condition. These Friendship Centres received a grant and received assistance in establishing a meaningful and varied program. There are centres located in Geraldton, Parry Sound, Port Arthur, Red Lake, Toronto and London.

WELFARE SERVICES

There is a Welfare Consultant attached to the Indian Community Development Services Branch from the Department's Municipal Welfare Administration Branch. His role is to assist in the provision of welfare services to Indians by the Band itself. As a result the Indian communities learn of the available provincial services and are gradually utilizing them. Departmental personnel, with the direct assistance of the Welfare Consultant, visit Indian Bands to provide information concerning Ontario welfare programs, to conduct needs surveys at the request of Band Councils, and to offer guidance in the establishment of a sound administration.

In order to assist Indian Bands to acquire the administrative techniques which are necessary to operate the programs the Band Welfare Administrators requested and received training programs from the Department through the Staff Training and Development Branch.

LEGAL AID ASSESSMENT BRANCH

When the Ontario Legal Aid Plan was introduced on March 29th, 1967, the responsibility of this Department in relation to the plan was assumed in part by the Field Services Branch and in part by the Family Benefits Branch. The Legal Aid Assessment Branch was formed in April, 1968, to take over this responsibility.

Applications for legal aid may be made through any lawyer in the Province or directly to an Area Director who has been appointed by the Law Society subject to the approval of the Attorney-General.

The Legal Aid Assessment Branch has the responsibility of assessing the resources and needs of applicants referred by the Area Directors, and of making recommendations as to whether applicants can pay no part, some part or all of the costs of the legal services they require. During the period April 1st, 1967 to March 31st, 1968, 53,559 persons were referred by the Area Directors to the Branch for interviews and a recommendation.

In York County a unit of this branch is located adjacent to the Area Director's office to conduct these interviews. In other areas of the Province, Branch staff is attached to the various Regional Offices of the Field Services Branch. In the thinly populated areas where there is not a sufficient volume of work to constitute a fulltime position workers do some field or clerical duties for the Field Services. On the other hand, where the volume of work is insufficient to justify having a representative from this Branch, the legal aid interviewing is done by a representative of the Field Services Branch, which works in close co-operation with the Legal Aid Assessment Branch.

While the majority of the decisions and recommendations are made in the local offices, certain of the more difficult applications are referred to the Review and Standards Unit. These are applications that involve such cases as bankruptcies, ownership or partnership in a business, appeals, and where it appears the applicant may have transferred assets for the sole purpose of applying for legal aid. This unit is also responsible for reviewing recommendations made throughout the Province with the object of maintaining uniformity and obtaining statistical information.

Frequently persons applying for legal aid require other social services or assistance. During a three-week period the York County Unit referred 20 persons to the Family Benefits Branch, 10 persons to educational or retraining programs, and 13 persons to credit or family counselling agencies. Sometimes family counselling is more appropriate than the provision of legal aid for a divorce, or credit counselling is more appropriate than legal aid in bankruptcy proceedings.

MUNICIPAL WELFARE ADMINISTRATION BRANCH

GENERAL WELFARE ASSISTANCE

The General Welfare Assistance Act is the legislation under which the Provincial Government subsidizes payments made by Municipalities and Indian Bands to persons in need. In geographical areas without municipal government, the Regional Offices of this Department administer this aid directly.

The assistance granted is of three types: General Assistance, Special Assistance and Supplementary Aid. This division was introduced by extensive revisions made to the legislation effective April 1, 1967. In the current year the benefits of these amendments began to show their full effect so that considerable increases in costs appear as compared with the 1967-68 period.

The chief amendment to the General Welfare Assistance Act and Regulations in 1968-69 was the establishment of a Board of Review. An applicant or recipient of General Assistance may appeal to the Board against any decision made by a Municipal or Provincial Welfare Administrator concerning his eligibility for aid or the amount or condition of the allowance. The Board then conducts a hearing where all parties may be present and has the authority to direct the Administrator to revise his decision to conform to the legislation.

COUNTY WELFARE UNITS AND DISTRICT WELFARE ADMINISTRATION BOARDS

Municipalities may administer their welfare programs individually or join with other Municipalities to form County Units or District Welfare Administration Boards.

During the fiscal year 1968-69, the Municipalities of six counties (Hastings, York, Oxford, Bruce, Prescott and Russell) and the District of Cochrane adopted the united system. The other counties and districts already in operation were Essex, Kent, Prince Edward, Simcoe, Victoria, Welland, Wellington and Wentworth Counties and Algoma, Nipissing, Parry Sound, Rainy River and Sudbury Districts. In total, 14 counties and 6 districts are on a consolidated basis replacing the individual administration of 376 Municipalities.

It may not be possible for smaller municipalities to put into effect all of the welfare programs and services which are provided under Provincial legislation. However, when these programs are administered on a County or District basis, they can be made available to residents there who require them. Experience to date has shown that a consolidated welfare system can make possible a uniformly high standard of service

throughout the County or District, efficiency in administration and financial control, and closer co-ordination with other agencies such as Children's Aid Societies, Family Courts, Manpower Centres, and the like. According to provisions in The General Welfare Assistance Act, Ontario pays a subsidy equal to 50% of the cost of staff salaries and travelling expenses as approved for the administration of welfare services in a county or in a district having a District Welfare Administration Board, the latter being effective after the first year of operation.

Other Municipalities, where there is a full-time Welfare Administrator, receive, as administration subsidy, 50% of the amount by which current costs exceed the costs of the base year of 1964.

COMPONENT PROGRAMS

General Assistance is the payment of a maintenance allowance to a person or family in need to cover such basic costs as food, clothing, personal requirements, utilities, household supplies, shelter and fuel. It is mandatory for the Municipality to grant such aid both to unemployed persons and those who are, for some reason, unemployable. The subsidy received through the Province is 80% of the issuance.

The number of persons supported by General Assistance was 117,500 in March, 1969. The total expenditure for the year was approximately \$52 million, a notable difference from about \$33 million in the prior year. The increase was in large part due to increases in the rate of allowance and in the number of persons assisted, particularly in the earlier months of 1968.

Nursing Home Care, technically a part of General Assistance, is a payment to cover wholly or partially the cost of maintaining a person in a private licenced nursing home. The maximum subsidizable rate was increased, as of January 1, 1969, from \$8.50 to \$9.50 per day. The provincial subsidy is 80% of the cost to the Municipality.

The number of persons maintained (March 1969) was 3,515.

Special Assistance is granted at the discretion of the Municipality to persons in need. It is a payment to cover the cost of such items as prescribed drugs, dental and optical services, prosthetic devices, transportation, vocational training, comfort allowances to residents of nursing homes and funerals and burials.

The rate of subsidy is 50%. In the month of March, 1969, the number of persons assisted was 13,188.

Supplementary Aid is a municipal payment to people already receiving other governmental allowances. Persons eligible include recipients of an Old Age Security Pension or any form of Family Benefits.

If a person has extraordinary needs, including any of the items listed above under Special Assistance, the Municipality may, at discretion, grant up to \$20.00 per month per individual and receive provincial subsidy of 80%.

The number being assisted as of March, 1969, was 6,472 persons.

HOMEMAKERS AND NURSES SERVICES

Through The Homemakers and Nurses Services Act and Regulations many families and individuals are enabled to receive the skilled and professional services of a homemaker or a visiting nurse in their own homes.

REGULATIONS AMENDMENT

This year brought amendments to The Homemakers and Nurses Services Act (1958), effective September 1, 1968. The definition of a "person in need" is introduced for the first time. The "needs test" is set out on a new Form 5 which determines "the available monthly income" of the applicant. No fixed amount of liquid assets are defined: the Welfare Administrator simply "takes into account the liquid assets that are available". Charge-back between municipalities are eliminated. Subsidy payments by the Province to the Municipality are increased from 50% to 80%. In unorganized areas of the Province, our provincial representative arranges that the Province pay 100% of the cost.

HOMEMAKERS SERVICES

Emergency homemakers service is used to great advantage in holding a family together when the mother is unable to care for her home and children because a medical or social problem has developed. Many disabled, handicapped or elderly persons are able to remain in their own home with a Homemaker in the home a few hours each day or week.

Another important function of a Homemaker is to work with deprived families in an effort to help them raise their level of living. It is a simple economical and flexible means that offers an immediate way of help and hope to people. It enables them to make the most of whatever resources are available, not only in the management of their money, but in many aspects of their daily lives. The Homemaker augments services provided by other community agencies. She does this by demonstration in the home, as well as by helping with the care of children, the maintenance of the home and other activities of daily living.

VISITING NURSES SERVICE

Visiting nurses service in the home enables ill people to be treated at home instead of hospital, and permits many handicapped, elderly or chronically ill persons to remain in their own home for extended periods of time, before it becomes necessary to place them in a Nursing Home, Charitable Institution, or Home for the Aged.

HOMEMAKERS AND NURSES SERVICES

SUMMARY OF ASSISTANCE

	Homemakers Services		Percentage Increase
	1968-69	1967-68	
Total Cases	6,174	6,621	—6.75

Total Cases	14,780	15,158	—2.49
Total Visits	134,750	144,798	—6.94

SOLDIERS' AID COMMISSION AND THE ONTARIO CANTEEN FUND

The Soldiers' Aid Commission and the Ontario Canteen Fund are operated as a single agency to relieve the distress of veterans of the First World War, and their dependents. In the fiscal year 1968-69, 609 such veterans and dependents were given financial assistance that they could not have received from any other source.

SOLDIERS' AID COMMISSION

Applications for assistance	326
Applications approved	318
Total expenditure	\$22,885.92

ONTARIO CANTEEN FUND

Applications for assistance	378
Applications approved	291
Total expenditure	\$22,069.20

By negotiation with the creditors of the applicants considered by Soldiers' Aid Commission and the Ontario Canteen Fund debts in amount of \$69,402.68 were settled for a total of \$44,955.12.

At one time educational assistance to veterans and their dependents was a major expenditure. This is now tapering off. There is a noticeable increase in recent years in assistance for roof repairs. With the average age of the First World War veteran being 75, many need assistance with repairs and upkeep they are no longer able to do themselves.

As in past years, the Soldiers' Aid Commission and the Ontario Canteen Fund continues to enjoy utmost co-operation from the Department of Veteran Affairs, the Royal Canadian Legion, and the World War II Benevolent Funds of the Canadian Navy, Army and Air Force.

Since the Soldiers' Aid Commission and the Canteen Fund combined in 1949, assistance in the amount of \$1,153,962.89 has been granted to veterans and dependents.

VOCATIONAL REHABILITATION SERVICES BRANCH

The year 1968-1969 has seen a continuation of the rapid growth of the programs of the Branch. During the year 3,641 handicapped persons were referred for service, while a total of 8,179 persons received assistance, as compared with 6,596 the previous year.

The purpose of the Branch is to restore and develop the working capacity of handicapped persons, and to prepare and place them in safe and satisfying employment. To achieve this goal, the Branch provides seven basic services; assesment, medical restoration, counselling, vocational training, travel and maintenance allowances, occupational tools and equipment, and placement in employment.

ASSESSMENT

Medical, social and vocational assessment to determine the nature of the disabled person's handicap, and to develop plans to overcome the handicap, is the foundation of all rehabilitation services. Assessment is undertaken by counsellors of the Branch, in consultation with the patient's attending physician, as well as psychologists, teachers, and employers. In addition, special assessment facilities offered by rehabilitation workshops and medical rehabilitation centres are used extensively.

MEDICAL RESTORATION

Since the restoration of the disabled person to the maximum level of employability is the ultimate goal of rehabilitation, provision of medical and related services, such as artificial appliances, is particularly important. Despite the fact that the majority of the disabled persons seen by the Branch have already received some type of medical attention prior to referral, the demand for restoration services further increased during this fiscal year. The number of persons assisted increased from 728 to 1,095 (53%), the number of services provided from 1,005 to 1,620 (61.5%), while expenditures rose from \$148,575.00 to \$206,439.00.

The provision of artificial limbs continues to remain the most frequent type of service provided, while dental care and orthopaedic shoes and appliances follow close behind.

COUNSELLING

The key to the rehabilitation program is the counselling and guidance provided through all phases of rehabilitation, to help the disabled person select and achieve the right job objective. An additional eighteen counsellors and supporting clerical staff were recruited to strengthen this aspect of our work.

VOCATIONAL TRAINING

The high rate of expansion is most clearly illustrated in the growth of services to disabled persons who received training as part of the rehabilitation program. In 1965-66 the Branch provided the equivalent of 5,700 months of training. In 1967 this number increased to 10,000, while in 1968-69 over 12,000 months of training were provided.

It is interesting to note that for the first time clerical and skilled trades were no longer the leading occupations for which training was provided. These have been surpassed by professional and general academic upgrading and work adjustment training. In fact, work adjustment training represents nearly one half of all the training provided and again reflects the more severe degree of handicap being referred to the Branch, and the increasing opportunities being provided through the development of occupational training by workshops for persons suffering from mental illness and mental retardation.

MAINTENANCE AND TRANSPORTATION

Another essential service is the provision of maintenance and transportation allowances during training and restoration. Approximately 65% of all trainees received maintenance allowances, involving a total expenditure of \$1,257,201.00.

OCCUPATIONAL TOOLS

Equipment and tools which are necessary to enable trainees to obtain a particular job are provided. Barbering, watchmaking, and electrical equipment repair continue to be the chief occupations where such help is required.

PLACEMENT

The provision of employment is the final goal of vocational rehabilitation. During the year, 590 disabled persons were placed directly in employment, while 956 were successfully employed following the provision of training, medical treatment, and artificial appliances. Thus, for the first time in the history of the program, well over 1,546 persons were re-established into gainful employment.

CONTINUOUS EMPLOYMENT IN SHELTERED WORKSHOPS

Experience in the past number of years has repeatedly demonstrated that for the more severely physically and emotionally disabled, specialized facilities, such as sheltered workshops, have become a necessary and indispensable tool of the rehabilitation process. The sheltered workshop which simulates a real work setting is being used, not only for assessment purposes, and for the determination of vocational potential, but also increasingly more often for long-term employment for the more seriously handicapped.

The year 1968-69 marks the second year the Branch has assisted workshops through the provision of capital grants for equipment and construction and operating grants in the amount of \$20.00 per person per month based on an approved number for each sheltered workshop registered and approved by the Branch. In 1968-69 the number of approved workshops increased from 87 to 93 and the attendance in the workshops increased from 2,372 to 2,487. The amount expended on operating grants for these individuals was \$447,960.00 and the capital grants amounted to \$85,092.00.

The Branch has been greatly encouraged by the efforts of the voluntary organizations administering the workshops to expand and improve their programs and to take advantage of the new funds being made available to them.

**FINANCE AND ADMINISTRATION
DIVISION**

ACCOUNTS BRANCH

The basic function of the Accounts Branch is to supply the necessary financial operation to fulfill the requirements of the various pieces of legislation under which the Department operates. The structure of the Branch is divided into several units—the General Accounting Unit, the Reconciliation Unit, the Payroll Unit, the Bookkeeping Machine Unit, the Claims Unit and the Accounts Receivable and Cash Unit.

The Accounts Branch has the responsibility of recording and passing for payment all Departmental expenditures to the Treasury Department. In the fiscal year ending March, 1969, expenditures of the Department totalled over \$242,000,000 which represents an 18% increase over the previous year.

Another function is obtaining revenue under the various agreements with the Government of Canada and other sources. The revenue for this year totalled about \$118,000,000, an increase of \$4,000,000 over last year.

The Accounts Branch also consolidates and assists in the preparation of the budget for each Branch of the Department, prepares the 5-year financial forecast, draws up monthly expenditure statements and prepares financial reports as requested.

AUDIT SERVICES BRANCH

The purpose of the Audit Services Branch is to centralize all the audit service functions required by the Department of Social and Family Services. In the three years since its inception, the Branch has grown in size and scope to meet the ever increasing demand.

The Branch is directed and supervised by professionally qualified accountants. The staff of the Branch are trained in auditing skills and many of them are progressing through studies to attain status as professionally qualified accountants, as part of an upgrading system.

The main objective of the Audit Services Branch is to verify that the payments of subsidies and grants to municipalities, charitable organizations and private agencies and of allowances and services to or on behalf of individuals are correct and in accordance with the Provincial and Federal legislation, regulations and agreements.

Branch functions were divided between external audit and internal audit services. External audit of municipalities, societies, institutions and private agencies who submit claims for subsidies and grants, involved a thorough audit of over 200 cases for the fiscal year 1968-69, and occupied about two-thirds of the work load. The remainder of the Branch activities involved on-going internal audit of applications by individuals for allowances, services and financial assistance, various records of the Department and claims under Federal-Provincial Cost Sharing Agreements.

ADMINISTRATIVE SERVICES BRANCH

The Administrative Services Branch provides a wide range of support services to the entire Department, so varied in fact, that a considerable range of skills are required in most staff members.

The Office Accommodation Section provides liaison with the various Branches of the Department of Public Works to obtain office space, communications, equipment and general house-keeping services in approximately fifty locations. During 1968-69, new offices were opened at Keewatin, Armstrong, Bancroft and Stratford. Improved or enlarged facilities were negotiated at Chatham, Dryden, Thunder Bay, Hamilton, North Bay, Sault Ste. Marie and Kirkland Lake. This section will continue to improve existing office facilities to better serve the people of Ontario.

The Publications Section of the Branch deals with the printing and distribution of pamphlets and other publications of the Department. In the fall of 1968, the printing shop and its employees were transferred to the Department of Public Works, but a stock room is still in operation to supply the various municipalities, social agencies and general public with the copies of legislation, forms and miscellaneous publications. Approximately twelve enquiries per day were received from the general public for Departmental publications.

The Branch also provides art services for the Department in the form of illustrating leaflets, doing graphs and lettering. Audio visuals were introduced on an experimental basis to serve the Staff Training program and improve communications between this Department and various social service agencies. Other special art services included special exhibits, such as the slide presentation at the 1968 Canadian National Exhibition.

The mail room processed approximately 950,000 pieces of mail, exclusive of allowance cheques, representing 6.6 per cent increase over the previous year.

COMMUNICATIONS BRANCH

The purpose of the Communications Branch is to publicize the numerous and varied programs of the Department and to provide an effective and consistent flow of information to the news media and to the public.

In presenting the many facets of Social and Family Services, the Communications Branch relied on four main outlets:

- (1) Pamphlets and reports,
- (2) News releases,
- (3) Direct public contact, and
- (4) Special presentations.

The large number of new Acts and Amendments relating to the Department, as well as the recent change of name, had rendered obsolete most existing pamphlets and other publications. During the year, 9 new publications were prepared, of which 6 were in print at the year's end. One Annual Report, 1966-67, had been printed and another was in the final stages of preparation.

As news releases are of prime importance in cultivating widespread public interest and good will, their issuance received a high priority. Grants, speeches and personal appearances by The Honourable the Minister and senior staff members received appropriate press coverage. In addition a press tour of Northern Ontario was arranged which resulted in a series of informative articles by a leading Toronto newsman.

Responding to requests and questions regarding specific information which are available in existing publications, comprised a large percentage of the day-to-day activities of the Branch. In order to improve the flow of information a new pamphlet series was designed, and these new brochures, prepared in close co-operation with the branches concerned, provide a most useful description of a wide range of departmental activities.

In August an ambitious multi-slide presentation was prepared, in conjunction with the Administrative Services Branch, for the departmental Exhibit at the C.N.E. The merits of over one thousand slides were assessed, script was prepared and an accompanying pamphlet was produced. The production, outlining three aspects of the Department's concern—children, the elderly and vocational rehabilitation—received favourable attention. In this connection grateful acknowledgement, for the use of slide material, is given to the many departments, organizations and private persons who contributed to the success of this display.

As it enters its second year of operation the Communications Branch aims to accelerate the pace of its activities in line with increasing activities in line with increasing responsibility and broader objectives. The on-going work of revising and reissuing existing publications will continue. This in conjunction with the appearance of new material will ensure a good supply of up-to-the-minute publications for general distribution, both in English and French.

Through the utilization of every communication media and technique the Branch will carry on its task of presenting to the public the wide range of programs as well as the achievements of the Department.

LEGAL SERVICES BRANCH

Services provided during the year included assisting in the preparation of the legislative program of the Department for introduction into the Legislature, preparation of preliminary drafts of various statutes, the preparation of material for the enactment of regulations and orders-in-council, advising the Minister and his Deputy and all branches of the Department on legal questions arising out of their various duties and answering inquiries made to the Department of a legal nature from solicitors and agencies outside the Department.

APPEAL TRIBUNAL FOR WELFARE RECIPIENTS

Legislative changes introduced by the Minister during the year included the establishment of a Board of Review for applicants or recipients of allowances under:

- The Family Benefits Act, 1966,
- The General Welfare Assistance Act, and
- The Vocational Rehabilitation Services Act, 1966.

An applicant or recipient who was dissatisfied with a ruling made on behalf of the Department or a municipality, as the case may be, can appeal to this independent tribunal. A further appeal is available from the tribunal's decision to the Court of Appeal on questions of law.

INDIAN SERVICES

In recognition of the increasing importance of the services by the Department to Indian bands, a program was initiated for the revision of all legislation to confer legislative authority on Indian bands and to enable the bands to receive financial assistance from the Province. The Homes for the Aged and Rest Homes Act was amended during the year to permit the establishment of institutions under that legislation by Indian bands and to pay grants and subsidies to the bands for that purpose.

REMOVAL OF RESIDENTIAL REQUIREMENTS

Statutes providing for grants and subsidies to various classes of residential institutions were amended during the year to remove from them a restriction that limited the admission to institutions to those who had resided in the Province for one year or longer. The legislation affected included:

- The Charitable Institutions Act, 1962-63
- The Homes for Retarded Persons Act, 1966
- The Children's Institutions Act, 1962-63
- The Homes for the Aged and Rest Homes Act

DAY NURSERIES

An important amendment was made during the year to the regulations under The Day Nurseries Act, 1966 which broadened the "needs test" which determines the financial eligibility of a family to receive subsidies for day nursery services. The amendment makes available services under the Act to a broader range of low income family.

PERSONNEL BRANCH

In comparison to the two previous fiscal years, the Department received a moderate complement increase of 44 in the fiscal year 1968-69. This increased the complement from 1,258 to 1,302. Most of this increase was distributed in small numbers to the 18 branches with the greatest increase allotted to the Family Benefits and the Accounting Branches. Considerably greater activity was noted in the internal transfer of complement between Branches. The extent of this activity is indicated by the Departmental Enrolment Table where the greatest activity involved Main Office, Staff Training, Family Benefits, Legal Aid and Field Services. During the course of this fiscal year, further transfers took place which primarily affected the complement of the Vocational Rehabilitation, Family Services, Indian Development and Research and Planning Branches.

The Personnel Branch was reorganized in the summer of this year to provide more efficient services to the Department. The duties and responsibilities of positions were redefined and organized into three specific units, namely: personnel services, employment, and organization and classification.

PERSONNEL SERVICES

This section, responsible for all employee transactions and administration of fringe benefits, was very active on behalf of employees. Expansion during this year and from previous years saw an increase in all activities with the processing of more than 3,000 personnel transactions. These were of a variety of types and complexity including promotions within branches and on inter-branch transfers, lateral transfers, appointments, separations, demotions, transfers in and out of our Department from and to other government departments, merit salary increases, salary revisions and other less voluminous matters. A total of 198 employees were promoted, 19 employees transferred from other departments and 16 employees transferred to other departments.

This section implemented salary revisions for all employees. With the creation of Occupational Groupings and awards determined through the bargaining process and by management negotiation, the implementation of salary revisions has become a complex transaction.

Staff increases having also resulted in a considerably higher volume of service to employees requiring assistance on matters related to fringe benefits.

EMPLOYMENT SERVICES

The employment section was called upon to meet the staffing requirements of new branches, additional specialists from a variety of fields and the continuous needs of established branches. The new staff was produced through a variety of recruitment resources with a number of placements made as a result of vacancies created through internal promotion. A total of 290 people were hired during the fiscal year representing an average of 24 hires per month.

An Exit Interview program was initiated last fall. All employees terminating their employment with the Department were interviewed under this program. This program provided an opportunity to determine why employees were leaving and to make certain that these employees were aware of the various entitlements and personal requirements related to fringe benefits. It is anticipated that over a period of time, the Exit Interview will provide information of assistance to our recruitment and selection. Details concerning the distribution of separations is provided in the following tables.

ORGANIZATION AND CLASSIFICATION SERVICES

The classification section was active in each branch on either a partial or total review of job descriptions and organizational structures. Departmental reorganization resulted in the creation of new organization charts and position specifications (and their subsequent classification) for the Research and Planning, Systems and Procedures, the Family Services Branches and the Training and Staff Development Branch which evolved from a section in Main Office, the subsequently established branches of Financial Consulting and Communications, the totally reorganized Accounts and Audit Branches and the Family Benefits Branch new Widows with Children section and Maintenance Receivable positions. Involved was the creation of 84 new positions covering 140 employees. Some of this is in its final stages as the fiscal year ends and will be completed shortly.

Another major project was a typical reallocation of sub-professional social workers in the Vocational Rehabilitation Services Branch to the Rehabilitation Officer 1 and 2, Correctional Services classes, effective July 1st, 1968 requiring 16 new specifications to cover 45 employees. Other new classes assigned to the Department were Associate Deputy Minister, Assistant Deputy Minister, Departmental Accountant 9, Departmental Accountant 8, Economist 6, Economist 5, Librarian 3, Management Services Officers 3 and 4, and Personnel Officer 3(b).

Increases in salary rates were awarded all occupational groups covering departmental employees. Some received retroactive pay for portions of the previous fiscal year, others a two-phase increase which meant an additional award during the present year. Phase 2 of the General Services group was awarded the second 4% of the 8% agreement covering 49.9% of the departmental staff. The Social Services group, covering 43.7% of departmental staff, was awarded 15% and 14% in two equal phases for professional staff and sub-professionals respectively. The first phase was effective June 29th, 1968. Much of the Administrative Services group, approximately 5.4% of staff, received approximately 4 to 8% but the remainder have not been determined at the end of the fiscal year. Scientific Services, which comprises only 1.0% of departmental staff, was awarded increases varying from 4% to 16% dependent on classification.

The Classification Section now maintains 120 separate job classifications for positions in the Department. Compared to last year, this represents 11 new job classifications used for employees of the Department.

RESEARCH AND PLANNING BRANCH

The Research and Planning Branch was started in November 1968; most of the remainder of the year was spent in recruiting staff and familiarizing them with the operation of the Department.

The basic purpose of the Branch is to provide background data on topics associated with the planning, development, implementation or alteration of social assistance or social service programs. The first project assigned was the development of a management information system so that Branch directors and senior officials could assess the impact of their programs and see what effect changes in them would have. Some preliminary work was done in preparation for an analysis of the Family Benefits payroll and arrangements were made for the use of computer facilities in other Departments. The development and improvement of information collection and analysis facilities will be an on-going research project for a number of years.

Other subdivisions of the Branch will be created; it is expected social workers, sociologists and economists will be added to the staff to review specific subject matter areas. Some problems of concern to the Department are the Negative Income Tax, the organization of social services (particularly with the publication of the Seeborn Report in Great Britain) and other related topics.

The Departmental Library was transferred to the Branch and work was begun to improve its facilities and gather research materials. By March, 1968, the library had acquired about 2,000 books, 100 periodical titles, and numerous pamphlets, besides government documents and other research material.

At the end of the fiscal year a Dominion-Provincial Committee on the costs of welfare programs had just been established. It is expected the Research and Planning Branch will be involved in developing a common approach among all the Provinces to the problem of presenting statistics on welfare programs.

SYSTEMS AND PROCEDURES BRANCH

This Branch was established with effect from April 1st, 1968, and had as its prime objective the raising of efficiency levels in the Department through the improvement of systems.

The recommendation that this Department have a Systems and Procedures Branch came from a report on organization prepared by Advisory Services Division of the Treasury Board. Other recommendations contained in that report included the setting up of a data-processing committee and strengthening of the existing unit-record section.

The data-processing committee will be convened as soon as the government-wide Planning Programming Budgeting System has been installed. At this point it will be possible to seriously consider some sophisticated computer applications, especially in the areas of Family Benefits and Accounting Branches.

Meanwhile, the activities of the Branch have considered mainly manual operations, which in some cases have been improved by the acquisition of up-to-date machinery. Machines were purchased for the Central Index Section of the Family Benefits Branch, to provide faster access to the index cards, thus increasing efficiency in the Section by liberating more time for other functions.

Other projects during the year included file organization, routing of correspondence, microfilm feasibility studies, conversion of Rehabilitation Branch pay list from manual to key punch operations, and a system to improve the collection of overdue maintenance payments (Mothers' Allowances). As systems investigations gain more and more acceptance, this Branch will become increasingly called upon to help make gains in efficiency and reductions in operational costs.

TRAINING AND STAFF DEVELOPMENT

The adequate provision of social services of the Department whether through legislation or policies depends on the ability of the staff to translate them into action. The Training and Staff Development Branch attempts to help staff achieve its potential by:

1. Developing internal training programs and utilizing educational institutions to ensure that staff are equipped for the responsibilities and tasks assigned them,
2. Collaborating with the educational system in developing the manpower necessary to fulfill the requirements of the Department,
3. Participating in departmental planning to ensure that staff are equipped to deal with changes in legislation and policies.

I INTERNAL STAFF TRAINING ACTIVITIES

During this year, staff training programs could be defined as follows:

- (a) Orientation
- (b) In-service training
- (c) Staff development
- (d) Educational leave

(a) Orientation

The orientation of the new employee, regardless of his classification, is geared to an awareness of the structure of the Department and the services it provides. With equal importance each new employee must appreciate the relationship of the Department and other government departments to the Legislature.

The general practice has been to combine orientation to the department with the training of skills for the specific job of the employee. During this past year, however, an attempt was made to separate these functions. Two orientation courses were given to new employees from various branches of the Department. The results were favourable to the extent that this area of activity will be expanding.

(b) In-Service Training

Where educational institutions have not established courses to meet the needs of the Department it is necessary then to develop specific programs in the Department. During this year the Branch was involved in short courses for staff of various other Branches as well as other related agencies such as Children's Aid Societies. Procedural and training manuals have also been developed for Family Benefits, Municipal Welfare Administration, and Homes for the Aged.

Seventy-one persons participated in basic training courses for Field Services. The structure of the course had altered from a four week block plan to a three phase one. Phases I and III are of 2 weeks duration each in a classroom setting; and Phase II is of a 12-15 week duration in field

practice. This part of the course is generally carried out in the employee's Regional Office under the supervision of the local Regional Administrator or Supervisor. In addition, a basic course for 10 new supervisors in Field Services was given.

Two basic and one advanced courses were given for Indian Band Welfare Administrators.

A 10 session course was given for the assistant supervisors of Family Benefits Branch.

(c) Staff Development

This area of staff training is designed as a continuum program of up-grading the knowledge and skills of existing employees. It is accomplished through staff meetings, conferences, workshops, institutes, short courses, etc. These are sponsored by the Department as well as other social agencies and educational institutions.

An example is the annual workshop organized by the Vocational Rehabilitation Services Branch for all its staff.

(d) Educational Leave

Until such time that educational institutions can produce in sufficient numbers and quality fully trained graduates for the social services, it will be necessary for our Department to encourage existing staff with potential to return to school. Fifteen staff were granted educational leave with pay to attend Schools of Social Work and Ryerson Institute on a full-time basis. Many other staff received approval for reimbursement for specific courses taken on an extension basis either in the evenings or during the summer.

II COLLABORATION WITH EDUCATIONAL INSTITUTIONS

The policy of the Department is not to duplicate those programs which can be or are operated by educational institutions. At the same time, it is important for the Department and other social agencies to work closely with educational facilities to insure that appropriate courses are planned which will prepare staff for careers in social work and social services.

The activities in which the Department is involved with educational institutions are:

- (a) Provision of field instruction for students from Schools of Social Work, Ryerson, and Colleges of Applied Arts and Technology. The close relationship here with educational institutions not only provides students with the practice experience part of their curriculum but also serves as a feedback between the Department and the schools. Field instruction during the academic year was given by existing staff as part of their assignments as well as by four full-time instructors.
- (b) Provision of sixty-five bursaries to students in social work who are prepared to be employed in public welfare. This program in operation since 1951 has been effective as a recruiting device for the Department.

- (c) Participating in advisory committees relating to training. This avenue of participation serves to facilitate collaboration of educational institutions and social agencies for effective planning. Such activities are the Continuing Conference on Education and Training for the Social Services in Ontario and Advisory Committees in social service courses to several community colleges.

III PARTICIPATING IN DEPARTMENT PLANNING

This involves working closely with the various Branches of the Department in identifying the existing training needs and the changes in their programs which will affect future training. It may require a major change in the training programs for new staff as well as retraining of existing staff.

Planning also includes participation in committees related to training in a department. During the year the Branch was involved in the Minister's Advisory Council on Public Welfare Training, the Departmental Staff Training Committee, the Education Committee of the Ontario Welfare Officers Association, and the Staff Training Committee of the Ontario Association of Children's Aid Societies.
